Visualization Andrew H. Rininsland, Michael Heydt, Pablo Navarro Castillo, 2017-03-31 Turn your raw data into real knowledge by creating and deploying complex data visualizations with D3.js About This Book Understand how to best represent your data by developing the right kind of visualization Explore the concepts of D3.js through examples that enable you to quickly create visualizations including charts, network diagrams, and maps Get practical examples of visualizations using real world data sets that show you how to use D3.js to visualize and interact with information to glean its underlying meaning Who This Book Is For Whether you are new to data and data visualization, a seasoned data scientist, or a computer graphics specialist, this Learning Path will provide you with the skills you need to create web-based and interactive data visualizations Some basic JavaScript knowledge is expected, but no prior experience with data visualization or D3.js is required What You Will Learn Gain a solid understanding of the common D3.js development idioms Find out how to write basic D3.js code for servers using Node.js Install and use D3.js to create HTML elements within a document Create and style graphical elements such as circles, ellipses, rectangles, lines, paths, and text using SVG Turn your data into bar and scatter charts and add margins, axes, labels, and legends Use D3.js generators to perform the magic of creating complex visualizations from data Add interactivity to your visualizations including tool tips, sorting, hover to highlight, and grouping and dragging of visuals Write, test, and distribute a D3.js-based charting package Make a real-time application with Node.js and D3.js In Detail D3.js has emerged as one of the leading platforms to develop beautiful interactive visualizations over the web We begin the course by setting up a strong foundation, then build on this foundation as we take you through the entire world of reimagining data using interactive, animated visualizations created in D3.js In the first module, we cover the various features of D3.js to build a wide range of visualizations We also focus on the entire process of representing data through visualizations By the end of this module, you will be ready to use D3.js to transform any data into a more engaging and sophisticated visualization In the next module, you will learn to master the creation of graphical elements from data Using practical examples provided, you will quickly get to grips with the features of D3.js and use this learning to create your own spectacular data visualizations with D3.js Over the last leg of this course, you will get acquainted with how to integrate D3.js with mapping libraries to provide reverse geocoding and interactive maps among many other advanced features of D3.js This module culminates by showing you how to create enterprise-level dashboards to display real-time data This Learning Path combines some of the best that Packt has to offer in one complete, curated package It includes content from the following Packt products: Learning D3.js: Data Visualization, Second Edition by Andrew H. Rininsland D3.js By Example by Michael Heydt Mastering D3.js by Pablo Navarro Castillo Style and approach This course provides a comprehensive explanation of how to leverage the power of D3.js to create powerful and creative visualizations through step-by-step instructions in the form of modules Each module helps you skill up a level in creating meaningful visualizations *Data Visualization with Python and JavaScript* by Kyran Dale, 2016-06-30 Learn how to turn raw data into rich, interactive web visualizations with the powerful combination of Python and JavaScript

With this hands on guide author Kyran Dale teaches you how build a basic dataviz toolchain with best of breed Python and JavaScript libraries including Scrapy Matplotlib Pandas Flask and D3 for crafting engaging browser based visualizations As a working example throughout the book Dale walks you through transforming Wikipedia s table based list of Nobel Prize winners into an interactive visualization You ll examine steps along the entire toolchain from scraping cleaning exploring and delivering data to building the visualization with JavaScript s D3 library If you re ready to create your own web based data visualizations and know either Python or JavaScript this is the book for you Learn how to manipulate data with Python Understand the commonalities between Python and JavaScript Extract information from websites by using Python s web scraping tools BeautifulSoup and Scrapy Clean and explore data with Python s Pandas Matplotlib and Numpy libraries Serve data and create RESTful web APIs with Python s Flask framework Create engaging interactive web visualizations with JavaScript s D3 library

Mastering D3.js Pablo Navarro Castillo,2014-08-25 If you are a software developer working with data visualizations and want to build complex data visualizations this book is for you Basic knowledge of D3 framework is expected With real world examples you will learn how to structure your applications to create enterprise level charts and interactive dashboards

Interactive Data Visualization for the Web Scott Murray,2013-03-15 Create and publish your own interactive data visualization projects on the Web even if you have no experience with either web development or data visualization It s easy with this hands on guide You ll start with an overview of data visualization concepts and simple web technologies and then learn how to use D3 a JavaScript library that lets you express data as visual elements in a web page Interactive Data Visualization for the Web makes these skills available at an introductory level for designers and visual artists without programming experience journalists interested in the emerging data journalism processes and others keenly interested in visualization and publicly available data sources Get a practical introduction to data visualization accessible for beginners Focus on web based tools that help you publish your creations quickly to a wide audience Learn about interactivity so you can engage users in exploring your data

JavaScript Testing Beginner's Guide Liang Yuxian Eugene,2010 This book is organized such that only the most essential information is provided to you in each chapter so as to maximize your learning Examples and tutorials are given in an easy to follow step by step manner so that you can see how the testing process is being carried out and how the code is being written The source code also contains detailed explanation so that you know what the code is doing Multiple screenshots are used in places that matter so that you have a visual sense of what is happening Beginner JavaScript developers looking for essential ways to write test and debug JavaScript for different purposes and situations

Data Visualization with Python and JavaScript Kyran Dale,2023-01-31 How do you turn raw unprocessed or malformed data into dynamic interactive web visualizations In this practical book author Kyran Dale shows data scientists and analysts as well as Python and JavaScript developers how to create the ideal toolchain for the job By providing engaging examples and stressing hard earned best practices this guide teaches you how to leverage the power of

best of breed Python and JavaScript libraries Python provides accessible powerful and mature libraries for scraping cleaning and processing data And while JavaScript is the best language when it comes to programming web visualizations its data processing abilities can't compare with Python's Together these two languages are a perfect complement for creating a modern web visualization toolchain This book gets you started You'll learn how to Obtain data you need programmatically using scraping tools or web APIs Requests Scrapy BeautifulSoup Clean and process data using Python's heavyweight data processing libraries within the NumPy ecosystem Jupyter notebooks with pandas Matplotlib Seaborn Deliver the data to a browser with static files or by using Flask the lightweight Python server and a RESTful API Pick up enough web development skills HTML CSS JS to get your visualized data on the web Use the data you've mined and refined to create web charts and visualizations with Plotly D3 Leaflet and other libraries

Data Visualization Toolkit Barrett Clark, 2016-08-04 Create Beautiful Visualizations that Free Your Data to Tell Powerful Truths The depth of Barrett Clark's knowledge shines through in his writing clear concise and confident Barrett has been practicing all of this stuff in his day job for many years PostgreSQL D3 GIS all of it The knowledge in this book is real world and hard earned From the Foreword by Obie Fernandez Data Visualization Toolkit is your hands on practical and holistic guide to the art of visualizing data You'll learn how to use Rails jQuery D3 Leaflet PostgreSQL and PostGIS together creating beautiful visualizations and maps that give your data a voice and to make it dance Barrett Clark teaches through real world problems and examples developed specifically to illuminate every technique you need to generate stunningly effective visualizations You'll move from the absolute basics toward deep dives mastering diverse visualizations and discovering when to use each Along the way you'll build three start to finish visualization applications using actual real estate weather and travel datasets Clark addresses every component of data visualization your data database application server visualization libraries and more He explains data transformations presents expert techniques in JavaScript Ruby and SQL and illuminates key concepts associated with both descriptive statistics and geospatial data Throughout everything is aimed at one goal to help you cut through the clutter and let your data tell all it can This guide will help you Explore and understand the data visualization technology stack Master the thought process and steps involved in importing data Extract transform and load data in usable reliable form Handle spotty data or data that doesn't line up with what your chart expects Use D3 to build pie and bar charts scatter and box plots and more Work effectively with time series data Tweak Ruby and SQL to optimize performance with large datasets Use raw SQL in Rails window functions subqueries and common table expressions Build chord diagrams and time series aggregates Use separate databases or schema for reporting databases Integrate geographical data via geospatial SQL queries Construct maps with Leaflet and Rails Query geospatial data the Rails way and the raw SQL way

Data Visualisation with R Thomas Rahlf, 2019-11-23 This book introduces readers to the fundamentals of creating presentation graphics using R based on 111 detailed and complete scripts It shows how bar and column charts population pyramids Lorenz curves box plots scatter plots

time series radial polygons Gantt charts heat maps bump charts mosaic and balloon charts and a series of different thematic map types can be created using R's Base Graphics System Every example uses real data and includes step by step explanations of the figures and their programming This second edition contains additional examples for cartograms chord diagrams and networks and interactive visualizations with Javascript The open source software R is an established standard and a powerful tool for various visualizing applications integrating nearly all technologies relevant for data visualization The basic software enhanced by more than 14000 extension packs currently freely available is intensively used by organizations including Google Facebook and the CIA The book serves as a comprehensive reference guide to a broad variety of applications in various fields This book is intended for all kinds of R users ranging from experts for whom especially the example codes are particularly useful to beginners who will find the finished graphics most helpful in learning what R can actually deliver
