Cache Enabled Small Cell Networks With Local User Interest:

Interference Mitigation and Energy Management in 5G Heterogeneous Cellular Networks Yang, Chungang, Li, Jiandong, 2016-11-22 In recent years wireless networks have become more ubiquitous and integrated into everyday life As such it is increasingly imperative to research new methods to boost cost effectiveness for spectrum and energy efficiency *Interference Mitigation and Energy Management in 5G Heterogeneous Cellular Networks* is a pivotal reference source for the latest research on emerging network architectures and mitigation technology to enhance cellular network performance and dependency Featuring extensive coverage across a range of relevant perspectives and topics such as interference alignment resource allocation and high speed mobile environments this book is ideally designed for engineers professionals practitioners upper level students and academics seeking current research on interference and energy management for 5G heterogeneous cellular networks

Algorithms and Architectures for Parallel Processing Jaideep Vaidya, Jin Li, 2018-12-07 The four volume set LNCS 11334 11337 constitutes the proceedings of the 18th International Conference on Algorithms and Architectures for Parallel Processing ICA3PP 2018 held in Guangzhou China in November 2018 The 141 full and 50 short papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on Distributed and Parallel Computing High Performance Computing Big Data and Information Processing Internet of Things and Cloud Computing and Security and Privacy in Computing

Game Theory for Intelligent Network Control Paradigm Kim, Sungwook, 2026-01-21 Game theory emerges as a mathematical framework for analyzing and optimizing decision making in complex interactive environments making it well suited for intelligent network control paradigms As modern networks become autonomous traditional control strategies struggle when addressing issues like resource allocation and conflict resolution Game theory provides tools to model and predict strategic interactions among multiple intelligent agents within a network enabling robust adaptive and efficient control mechanisms This shift towards game theoretic network control paves the way for self organizing scalable and context aware networks capable of meeting the demands of next generation technologies *Game Theory for Intelligent Network Control Paradigm* explores applications of game theory current trends understudied areas and new directions for further investigation It presents an introduction on game theory with an emphasis on applications for intelligent control issues This book covers topics such as network control cloud computing and learning algorithms and is a useful resource computer engineers business owners academicians researchers and scientists

Wireless Edge Caching Thang X. Vu, Ejder Baştuğ, Symeon Chatzinotas, Tony Q. S. Quek, 2021-03-11 Understand both uncoded and coded caching techniques in future wireless network design Expert authors present new techniques that will help you to improve backhaul load minimization deployment cost reduction security energy efficiency and the quality of the user experience Covering topics from high level architectures to specific requirement oriented caching design and analysis including big data enabled caching caching in cloud assisted 5G networks and security

this is an essential resource for academic researchers postgraduate students and engineers working in wireless communications

Mobile Edge Computing Yan Zhang,2021-10-01 This is an open access book It offers comprehensive self contained knowledge on Mobile Edge Computing MEC which is a very promising technology for achieving intelligence in the next generation wireless communications and computing networks The book starts with the basic concepts key techniques and network architectures of MEC Then we present the wide applications of MEC including edge caching 6G networks Internet of Vehicles and UAVs In the last part we present new opportunities when MEC meets blockchain Artificial Intelligence and distributed machine learning e g federated learning We also identify the emerging applications of MEC in pandemic industrial Internet of Things and disaster management The book allows an easy cross reference owing to the broad coverage on both the principle and applications of MEC The book is written for people interested in communications and computer networks at all levels The primary audience includes senior undergraduates postgraduates educators scientists researchers developers engineers innovators and research strategists
