

# C++ Guide

NUMBER & CHARACTER

**Introduction**  
C++ is a general-purpose programming language that combines the efficiency of C with the ease of use of C++.

**Getting Started**  
This section provides a quick overview of the C++ environment, including how to compile and run a program.

**Variables**  
Variables are used to store data in a program. They are declared and then used to hold values.

**Control Structures**  
Control structures allow you to control the flow of execution in your program, including loops and conditional statements.

**Arrays**  
Arrays are used to store multiple values of the same type. They are indexed and accessed sequentially.

**Strings**  
Strings are used to store text data. They are represented as arrays of characters and are terminated by a null character.

**Pointers**  
Pointers are used to store the memory address of another variable. They allow for dynamic memory management.

**Advanced Topics**  
This section covers more advanced C++ features, such as templates, namespaces, and exception handling.
