Artificial Intelligence in STEM Education Fan Ouyang, Pengcheng Jiao, Bruce M. McLaren, Amir H. Alavi, 2022-12-29
Artificial intelligence AI opens new opportunities for STEM education in K 12 higher education and professional education contexts This book summarizes AI in education AIED with a particular focus on the research practice and technological paradigmatic shifts of AIED in recent years The 23 chapters in this edited collection track the paradigmatic shifts of AIED in STEM education discussing how and why the paradigms have shifted explaining how and in what ways AI techniques have ensured the shifts and envisioning what directions next generation AIED is heading in the new era As a whole the book illuminates the main paradigms of AI in STEM education summarizes the AI enhanced techniques and applications used to enable the paradigms and discusses AI enhanced teaching learning and design in STEM education It provides an adapted educational policy so that practitioners can better facilitate the application of AI in STEM education This book is a must read for researchers educators students designers and engineers who are interested in the opportunities and challenges of AI in STEM education

Digital Health Technologies for Shared Decision Making Marcus Cheetham, Christoph A. Meier, Nikola Biller-Andorno, Helena Canhao, Anna Lisa Martin-Niedecken, Annina Gähwiler, 2025-05-22
Patient decision aids provide a promising means to empower patients to prepare and participate in Shared Decision Making SDM with health care professionals A wide range of clinically validated and non validated digital and non digital patient decision aids continue to be developed for use in diverse settings and clinical interventions The end users of a given aid may be heterogeneous in their needs abilities backgrounds and personal characteristics Many patient decision aids are developed with the aim of helping patients clarify and communicate their subjective values and preferences in relation to the medical choices at hand Knowledge of these values and preferences can help patients and health care professionals determine the medical intervention that is right for the patient Digital health technologies present unique opportunities for creating new ways to advance the design adoption usage and evaluation of patient centred decision aids and support the clarification and communication of subjective values and preferences However there is a dearth of systematic research on these opportunities This Research Topic focuses on the current use of and the opportunities that digital technologies present for furthering the design development deployment and usefulness of patient decision aids Potential themes include but are not limited to 1 Digital technology and patient decision aids 2 New approaches designs developments and innovations 3 Human factors in elucidating subjective values and preferences 4 Awareness and real world use of digital patient decision aids 5 Usability and acceptability of digital patient decision aids 6 Current and potential applications in different settings 7 Barriers and facilitators to use of digital technology in SDM 8 Future possibilities and challenges of patient decision aids and digital technology 9 Inclusion diversity and accessibility of patient decision aids with digital technology and 10 Ethical technical and regulatory design considerations This Research Topic welcomes original research review method and theory and perspective

articles that address the diversity of themes around digital health technologies and human factors in patient decision aids
Brief research reports and mini reviews are also encouraged Articles types should be selected that correspond with the stage of research and scope of the contribution

Issues in Artificial Intelligence, Robotics and Machine Learning: 2013 Edition
,2013-05-01 Issues in Artificial Intelligence Robotics and Machine Learning 2013 Edition is a ScholarlyEditions book that delivers timely authoritative and comprehensive information about Expert Systems The editors have built Issues in Artificial Intelligence Robotics and Machine Learning 2013 Edition on the vast information databases of ScholarlyNews You can expect the information about Expert Systems in this book to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Artificial Intelligence Robotics and Machine Learning 2013 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>

Data Science and Its Applications Aakanksha Sharaff,G R Sinha,2021-08-17 The term data being mostly used experimented analyzed and researched Data Science and its Applications finds relevance in all domains of research studies including science engineering technology management mathematics and many more in wide range of applications such as sentiment analysis social medial analytics signal processing gene analysis market analysis healthcare bioinformatics etc The book on Data Science and its applications discusses about data science overview scientific methods data processing extraction of meaningful information from data and insight for developing the concept from different domains highlighting mathematical and statistical models operations research computer programming machine learning data visualization pattern recognition and others The book also highlights data science implementation and evaluation of performance in several emerging applications such as information retrieval cognitive science healthcare and computer vision The data analysis covers the role of data science depicting different types of data such as text image biomedical signal etc useful for a wide range of real time applications The salient features of the book are Overview Challenges and Opportunities in Data Science and Real Time Applications Addressing Big Data Issues Useful Machine Learning Methods Disease Detection and Healthcare Applications utilizing Data Science Concepts and Deep Learning Applications in Stock Market Education Behavior Analysis Image Captioning Gene Analysis and Scene Text Analysis Data Optimization Due to multidisciplinary applications of data science concepts the book is intended for wide range of readers that include Data Scientists Big Data Analysts Research Scholars engaged in Data Science and Machine Learning applications

Computational Intelligence in Surveillance Systems Using Image Processing Jay Kumar Pandey,Mritunjay Rai,Momina Shaheen,Faizan Ahmad,2026-03-07 Traditional surveillance systems struggle to process large volumes of visual data identify specific objects or behaviors and adapt to dynamic environments Computational intelligence which

encompasses techniques like artificial intelligence AI machine learning ML and computer vision offers powerful tools to address these challenges by enabling automated analysis pattern recognition and decision making based on visual data Computational Intelligence in Surveillance Systems Using Image Processing addresses the unique challenges and ethical considerations of applying AI and ML offering a nuanced understanding of the regulatory landscape It provides insights into the responsible development and deployment of technologies to unlock the transformative potential of computational intelligence to revolutionize surveillance systems and advance the capabilities of security and monitoring across various sectors Discusses emerging trends potential challenges and areas for future research providing a roadmap for scholars looking to contribute to the evolving field of image processing Explains how AI and ML algorithms can be applied to analyze and interpret visual data captured by surveillance cameras Considers the challenges and considerations associated with deploying computational intelligence in surveillance including privacy concerns ethical considerations and technical limitations Explores specific use cases and applications where computational intelligence can enhance surveillance capabilities such as object detection activity recognition anomaly detection and predictive analytics

Computation for Humanity Justyna Zander, Pieter Mosterman, 2018-10-03 The exponential progress and accessibility of computing has vastly increased data flows and revolutionized the practice of science engineering and communication Computing plays a critical role in advancing research across almost every scientific discipline Computation for Humanity Information Technology to Advance Society is a guide for the creation of services products and tools that facilitate support and enhance progress of humanity toward more sustainable life This book Provides a deep understanding of the practical applications of computation to solve human machine problems Delivers insight into theoretical approaches in an accessible manner Provides a comprehensive overview of computational science and engineering applications in selected disciplines Crosses the boundaries between different domains and shows how they interrelate and complement one another Focuses on grand challenges and issues that matter for the future of humanity Shows different perspectives of computational thinking understanding and reasoning Provides a basis for scientific discoveries and enables adopting scientific theories and engineering practices from other disciplines Takes a step back to provide a human related abstraction level that is not ultimately seen in pure technological elaborations collections The editors provide a collection of numerous computation related projects that form a foundation from which to cross pollinate between different disciplines and further extensive collaboration They present a clear and profound understanding of computing in today s world and provide fundamental solutions to some of the most pertinent humanity related problems
