Pevzner,2004   **Problems and Solutions in Biological Sequence Analysis** Mark Borodovsky,Svetlana Ekisheva,2006-09-04 This book is the first of its kind to provide a large collection of bioinformatics problems with accompanying solutions Notably the problem set includes all of the problems offered in Biological Sequence Analysis by Durbin et al Cambridge 1998 widely adopted as a required text for bioinformatics courses at leading universities worldwide Although many of the problems included in Biological Sequence Analysis as exercises for its readers have been repeatedly used for homework and tests no detailed solutions for the problems were available Bioinformatics instructors had therefore frequently expressed a need for fully worked solutions and a larger set of problems for use on courses This book provides just that following the same structure as Biological Sequence Analysis and significantly extending the set of workable problems it will facilitate a better understanding of the contents of the chapters in BSA and will help its readers develop problem solving skills that are vitally important for conducting successful research in the growing field of bioinformatics All of the material has been class tested by the authors at Georgia Tech where the first ever MSc degree program in Bioinformatics was held

Data Intensive Distributed Computing: Challenges and Solutions for Large-scale Information Management Kosar, Tevfik,2012-01-31 This book focuses on the challenges of distributed systems imposed by the data intensive applications and on the different state of the art solutions proposed to overcome these challenges Provided by publisher   ,   Data Mining and Constraint Programming Christian Bessiere,Luc De Raedt,Lars Kotthoff,Siegfried Nijssen,Barry O'Sullivan,Dino Pedreschi,2016-12-01 A successful integration of constraint programming and data mining has the potential to lead to a new ICT paradigm with far reaching implications It could change the face of data mining and machine learning as well as constraint programming technology It would not only allow one to use data mining techniques in constraint programming to identify and update constraints and optimization criteria but also to employ constraints and criteria in data mining and machine learning in order to discover models compatible with prior knowledge This book reports on some key results obtained on this integrated and cross disciplinary approach within the European FP7 FET Open project no 284715 on Inductive Constraint Programming and a number of associated workshops and Dagstuhl seminars The book is structured in five parts background learning to model learning to solve constraint programming for data mining and showcases   **ECAI 2006** Silvia Coradeschi,Anna Perini,Paolo Traverso,2006-08-15 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found
