MAX Phases and Ultra-High Temperature Ceramics for Extreme Environments Low, I. M.,2013-05-31 Ceramics are a versatile material more so than is widely known They are thermal resistant poor electrical conductors insulators against nuclear radiation and not easily damaged making ceramics a key component in many industrial processes MAX Phases and Ultra High Temperature Ceramics for Extreme Environments investigates a new class of ultra durable ceramic materials which exhibit characteristics of both ceramics and metals Readers will explore recent advances in the manufacturing of ceramic materials that improve their durability and other physical properties enhancing their overall usability and cost effectiveness This book will be of primary use to researchers academics and practitioners in chemical mechanical and electrical engineering This book is part of the Research Essentials collection

Handbook on Synthesis Strategies for Advanced Materials A. K. Tyagi,Raghumani S. Ningthoujam,2022-01-04 This book presents state of the art coverage of synthesis of advanced functional materials Unconventional synthetic routes play an important role in the synthesis of advanced materials as many new materials are metastable and cannot be synthesized by conventional methods This book presents various synthesis methods such as conventional solid state method combustion method a range of soft chemical methods template synthesis molecular precursor method microwave synthesis sono chemical method and high pressure synthesis It provides a comprehensive overview of synthesis methods and covers a variety of materials including ceramics films glass carbon based and metallic materials Many techniques for processing and surface functionalization are also discussed Several engineering aspects of materials synthesis are also included The contents of this book are useful for researchers and professionals working in the areas of materials and chemistry

Handbook of Materials Science, Volume 3 Raghumani S. Ningthoujam,A. K. Tyagi,2025-10-12 This book presents state of the art coverage on synthesis characterization and properties of catalytic materials including nanomaterials and recent advances in catalytic materials and their applications The contents include chapters on fundamentals of catalytic materials metal chalcogen complexes impact of ultrasonic frequencies on materials synthesis activation of alkanes and CO₂ metal metal oxide interfacial catalysis enzyme catalysis among others The contents of this book are useful for researchers and professionals working in the areas of materials science especially catalytic materials
