The British National Bibliography Arthur James Wells,2009 [On Raising a Digital Human](#) Norman I. Badler,2024-09-20 This book tells the story of building digital virtual human models in the context of the background choices and occurrences that shaped the author s own involvement and personal evolution Such digital models found motivating applications in engineering anthropology medical and group simulation problems and numerous connections to other disciplines informed and enriched their design development and deployment This personal perspective on developments in the field is enhanced by extensive citations that provide pointers into relevant literature recognize the contributions of co authors and collaborators and give external evidence for claims Both academic and corporate interest in virtual beings has exploded in recent years and while this book does not survey the current state of the art it is an essential window into how the field arrived where it is today The technical discussions throughout the book are deliberately accessible with extensive references to the literature for further reading This book will be of interest to readers who want to understand the history of virtual human beings how they evolved and especially how they must address numerous human characteristics to achieve any sense of human ness

[The Routledge Research Companion to Electronic Music: Reaching out with Technology](#) Simon Emmerson,2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music
