Citizenship and Advocacy in Technical Communication Godwin Y. Agboka, Natalia Matveeva, 2018-06-22 In *Citizenship and Advocacy in Technical Communication* teachers researchers and practitioners will find a variety of theoretical frameworks empirical studies and teaching approaches to advocacy and citizenship Specifically the collection is organized around three main themes or sections considerations for understanding and defining advocacy and citizenship locally and globally engaging with the local and global community and introducing advocacy in a classroom The collection covers an expansive breadth of issues and topics that speak to the complexities of undertaking advocacy work in TPC including local grant writing activities cosmopolitanism and global transnational rhetoric digital citizenship and social media use strategic and tactical communication and diversity and social justice The contributors themselves representing fifteen academic institutions and occupying various academic ranks offer nuanced definitions frameworks examples and strategies for students scholars practitioners and educators who want to or are already engaged in a variegated range of advocacy work More so they reinforce the inherent humanistic values of our field and discuss effective rhetorical and current technological tools at our disposal Finally they show us how through pedagogical approaches and everyday mundane activities and practices we can advocate either actively or passively

A Scientific Approach to Writing for Engineers and Scientists Robert E. Berger, 2014-05-23 A SCIENTIFIC APPROACH TO WRITING Technical ideas may be solid or even groundbreaking but if these ideas cannot be clearly communicated reviewers of technical documents e g proposals for research funding articles submitted to scientific journals and business plans to commercialize technology are likely to reject the argument for advancing these ideas The problem is that many engineers and scientists entirely comfortable with the logic and principles of mathematics and science treat writing as if it possesses none of these attributes The absence of a systematic framework for writing often results in sentences that are difficult to follow or arguments that leave reviewers scratching their heads This book fixes that problem by presenting a scientific approach to writing that mirrors the sensibilities of scientists and engineers an approach based on an easily discernable set of principles Rather than merely stating rules for English grammar and composition this book explains the reasons behind these rules and shows that good reasons can guide every writing decision This resource is also well suited for the growing number of scientists and engineers in the U S and elsewhere who speak English as a second language as well as for anyone else who just wants to be understood
