Theoretical Nursing Afaf Ibrahim Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher

enfermería como proceso con una elevada responsabilidad social que precisa dos requisitos la independencia y la libertad. Como la práctica profesional no es una isla sino un proceso integrado en la vida cotidiana se describe la filosofía de dicha práctica desde la orientación filosófica positivista y hermenéutica interpretativa y la necesidad de una complementariedad que se traduzca en una práctica de enfermería científica y humana. Este contenido pretende que reflexiones sobre los nuevos aportes de la filosofía a la disciplina de enfermería en el marco de los problemas sustantivos de su práctica y de los roles derivados de su hacer concreto que es cuidar la salud de la persona. En este sentido el propósito principal del libro es ofrecer una visión propia de enfermería como profesión y como disciplina científica interesada por el cuidado de la vida y que mediante un sistema de creencias ideológica y biológica necesaria en su quehacer profesional. Esto lo consideramos básico porque los valores que le asigne la enfermera a la persona tiene que ver con el conocimiento de la naturaleza humana y la esencia del ser ontológico. El libro está integrado por tres unidades. En la primera unidad revisamos la naturaleza filosófica de la enfermería a partir de su quehacer profesional y de la lógica del proceso de cuidado aspectos ontológicos epistemológicos antropológicos filosóficos y técnicos como la filosofía de la praxis. En la segunda hacemos un recorrido entre las posturas empírico analítica positivista y empírico hermenéutica hermenéutica en la epistemología del conocimiento en enfermería el cual a su vez como teoría genera una oposición entre el conocimiento obtenido en la reflexión y el conocimiento obtenido de la práctica o praxis de enfermería. Finalmente en la tercera unidad reflexionamos sobre cómo la sociedad tecnocrática en la que vivimos genera políticas de salud guiadas según la productividad y eficiencia como consecuencia del neoliberalismo que a su vez producen una alienación en el personal de salud por lo que los profesionales de enfermería para estar en consonancia con el cuidado deben estar guiados por una perspectiva humanista que integre la teoría con la práctica la praxis de enfermería y que logren el sentido de la práctica de enfermería trascender desarrollar sus potencialidades buscando hacer de su práctica una praxis constante y buscando siempre apoyado por la técnica y la tecnología la promoción de la vida la dignidad de la persona sustentada en el amor incondicional hacia la persona cuidada.

Theories Guiding Nursing Research and Practice Joyce J. Fitzpatrick, Geraldine McCarthy, 2014-06-06

This book has its origins in courses taught by the editors and their collaborators for doctoral students. It therefore addresses the need to focus on how theories can be applied in the real world of clinical practice and the research based on it. Introductory and concluding sections make the case for the importance of theoretical frameworks when developing practice and research settings. Eighteen chapters cover individual theoretical approaches. While some such as the theory of human caring and transformational leadership theory will be familiar to many readers in the UK, others cover new territory.

John Adams, honorary research associate, Faculty of Nursing and Midwifery, Royal College of Surgeons in Ireland, Nursing Standard.

This is the first book to clearly and fully demonstrate the process of using theory to guide nursing research and professional practice. It describes a step by step format for evaluating nursing theory's applicability to research, a format that links theory both middle range and grand theory to research on a wide range of clinical populations and care delivery systems. The book describes how theory analysis models are used to examine various nursing phenomena as they relate to nursing research and professional practice and provides key examples of how this is accomplished. The book takes the reader through the process of using a theory to guide research from inception of a research question to evaluation of future research.

International experts in theory related nursing research describe twelve theories that have previously been applied to research and practice and six theories that can be applied to future research and practice. Using a consistent analytic framework, each chapter applies a specific theory from either nursing, psychology, sociology or management to a particular clinical population or care delivery issue. These encompass clinical, administrative and educational nursing settings. The consistent format facilitates ease of comparison across different theories. Generous use of figures and tables further demonstrates the complex relationships between and among concepts embedded in the theories.
