Repurposing epistemology for the twenty-first century and beyond: A natural accompaniment for the advancement of knowledge Sujay Rao Mandavilli,2025-12-08 Let us begin this introduction by discussing what knowledge is But what exactly is knowledge Knowledge in its most common and mundane definition is taken to mean the information understanding and skills that are acquired through formal or informal education awareness generation mechanisms or

practical experience Knowledge is also processed and formalized through a cognitive contact with reality involving employment and deployment of the senses and cognitive ability for the most part It also required a formal awareness of facts familiarity with practical and other situations and different forms of practical ability Mechanisms of acquiring knowledge can range from rote memorization to critical thinking and the mental processing of complex facts Most people also understand knowledge as a familiarity awareness or understanding of a subject including theoretical or practical understanding of facts information and skills that are consciously acquired by perceiving discovering or learning Knowledge may be acquired either individually or through collective social action The acquisition of knowledge is an active process involving cognitive functions like perception reasoning analysis and evaluation Knowledge is not static it is a continuous and dynamic process that builds and grows over time *The Fountain* ,2009

Why we need a revolution in the Social sciences: A post-colonial perspective Sujay Rao Mandavilli,2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children s day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990 s even the mid 1980 s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors

Annamalai University,2008 [Flexible Management of Transfer Prices and Multiple Valuation Approach Based upon SAP ERP within the Context of International Controlling](#) Cenk Yildirim,2015-12-01 Master s Thesis from the year 2014 in the subject Business economics Controlling grade 1 7 University of Applied Sciences Fulda course Master of International Management language English abstract According to the estimations of the World Trade Organization sixty percent of the whole world trade is being concluded within the multinational enterprises This can be put down to the fact that globalization has had led the enterprises separate business processes into divisions and the concept of profit center has gained currency in

this regard As a result of vertical integration between these profit centers there is an enormous volume of exchanged goods within multinationals This development in the practice gave rise to debates on an already existing issue Transfer Pricing however from another dimension The inter company transfer of goods has gone beyond the domestic boundaries and become an important issue in the international context International Transfer Pricing can be assumed as an opportunity as well as a confounding factor from the perspective of multinational enterprises On the one side it is possible to move profits between individual divisions and create tax advantages depending on the corporate tax rates in different tax jurisdictions On the other side it becomes more complex for companies to track down the effects of intra company transfers evaluate the efficiency of the divisions and the company as a whole and make optimal decisions accordingly At this point some academicians propose using a multiple set of books to determine Transfer Prices In so doing they argue that managerial requirements can be met and optimal decisions can be reached for the good of the group as a whole In the light of this information a software product named SAP ERP comes to attention with its unique feature in terms of determining Transfer Prices flexibly The multiple valuation approach in this system enables the user set Transfer Prices in different valuation techniques i e legal view group view and profit center view This study investigates the relationship between these two research objects thus aims to verify whether and up to which extent implementing such a system is functional and beneficial by composing Transfer Pricing and managerial requirements that come along with it
