*Reliability of Geotechnical Structures in ISO2394* K.K. Phoon, J.V. Retief, 2016-11-25 The latest 4th edition of the international standard on the principles of reliability for load bearing structures ISO2394 2015 includes a new Annex D dedicated to the reliability of geotechnical structures The emphasis in Annex D is to identify and characterize critical elements of the geotechnical reliability based design process This book contains a wealth of data and information to assist geotechnical engineers with the implementation of semi probabilistic or full probabilistic design approaches within the context of established geotechnical knowledge principles and experience The introduction to the book presents an overview on how reliability can play a complementary role within prevailing norms in geotechnical practice to address situations where some measured data and or past experience exist for limited site specific data to be supplemented by both objective regional data and subjective judgment derived from comparable sites elsewhere The principles of reliability as presented in ISO2394 2015 provides the common basis for harmonization of structural and geotechnical design The balance of the chapters describes the uncertainty representation of geotechnical design parameters the statistical characterization of multivariate geotechnical data and model factors semi probabilistic and direct probability based design methods in accordance to the outline of Annex D This book elaborates and reinforces the goal of Annex D to advance geotechnical reliability based design with geotechnical needs at the forefront while complying with the general principles of reliability given by ISO2394 2015 It serves as a supplementary reference to Annex D and it is a must read for designing geotechnical structures in compliance with ISO2394 2015

*Applications of Cuckoo Search Algorithm and its Variants* Nilanjan Dey, 2020-06-23 This book highlights the basic concepts of the CS algorithm and its variants and their use in solving diverse optimization problems in medical and engineering applications Evolutionary based meta heuristic approaches are increasingly being applied to solve complicated optimization problems in several real world applications One of the most successful optimization algorithms is the Cuckoo search CS which has become an active research area to solve N

dimensional and linear nonlinear optimization problems using simple mathematical processes CS has attracted the attention of various researchers resulting in the emergence of numerous variants of the basic CS with enhanced performance since 2019
