economics questions the basic underpinnings of economic theory showing that people often do not act consistently in their
own self interest when making economic decisions While these findings have important theoretical implications they also
provide a new lens for examining public policies such as taxation public spending and the provision of adequate pensions
How can people be encouraged to save adequately for retirement when evidence shows that they tend to spend their money
as soon as they can Would closer monitoring of income tax returns lead to more honest taxpayers or a more distrustful
uncooperative citizenry Behavioral Public Finance edited by Edward McCaffery and Joel Slemrod applies the principles of
behavioral economics to government s role in constructing economic and social policies of these kinds and suggests that
programs crafted with rational participants in mind may require redesign Behavioral Public Finance looks at several facets of
economic life and asks how behavioral research can increase public welfare Deborah A Small George Loewenstein and Jeff

features of 401 k plans on employee savings behavior They find that when employees are automatically enrolled in a
retirement savings plan they overwhelmingly accept the status quo and continue participating while employees without
automatic enrollment typically take over a year to join the saving plan Behavioral Public Finance also looks at taxpayer
compliance While the classic economic model suggests that the low rate of IRS audits means far fewer people should
voluntarily pay their taxes than actually do John Cullis Philip Jones and Alan Lewis present new research showing that many
people do not underreport their incomes even when the probability of getting caught is a mere one percent Human beings
are not always rational utility maximizing economic agents Behavioral economics has shown how human behavior departs
