**The Palgrave Handbook of Human-Animal Interactions in the Global Context of Climate Change, Disasters, and Other Crises** Haorui Wu, Kyle Breen, Sarah E. DeYoung, 2025-11-10 The increasing frequency scope and magnitude of global extreme events affect humans and their animal co-inhabitants on our shared planet. This book features a first of its kind comprehensive text addressing human-animal interactions (HAIs) in the context of climate change, disasters, and other crises. This book presents international professionals' HAI-driven leading ideas, debates, approaches, and promising efforts, providing a range of perspectives across the entire disaster cycle from the Global South and North. Their knowledge, experience, and expertise contribute to a nuanced understanding of disaster-specific HAIs, shedding light on enhancing human-animal welfare, promoting trans-species justice, and building resilience. Students, researchers, educators, practitioners, policymakers, and others can apply this expertise to enhance human-animal welfare and resilience in the global disaster settings. **Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change** Gustavo J. Nagy, Desalegn Yayeh Ayal, 2025-11-04 Over recent years, nature-based solutions (NbS) have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process. More specifically, the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation. NbS are methods that use and enhance nature to improve social and environmental challenges. They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people. Therefore, these solutions are useful in climate change adaptation and mitigation. There are 3 main areas which NbS may target: namely, reducing exposure, reducing sensitivity, and supporting adaptive capacity. Reducing exposure refers to protecting areas from existing climate change effects. There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts. It is against this background that the Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change is being produced. The publication will showcase experiences related to NbS from around the world. In particular, it will gather examples of projects, studies, and the latest thinking on NbS which can serve the purpose of inspiring and fostering further works in this key area. Thanks to its scope and thematic diversity, the book will be of special interest to representatives from government organisations, researchers, and students from a wide range of natural and social sciences courses. It will also provide useful information to practitioners and representatives from non-governmental organisations.
