energy hub within the South East Asian region Under these circumstances this research conducts a comprehensive literature review regarding the past development as well as the current situation of renewable energy utilization in Thailand which concludes in the identification of the importance of renewable energy in the given context and closes with both a distinctive need assessment and a conceptual framework for Thailand's future renewable energy strategy Subsequently the research introduces a unique primary research endeavor in the form of an explorative expert interview survey which succeeds in a substantial collection of qualitative and in depth data These valuable data is first objectively analyzed and second subjectively interpreted and summarized to become the major source for the derivation of a multitude of potential strategic recommendations for an enhanced future renewable energy utilization development in Thailand Finally the entirety of these recommended strategic approaches based on both the secondary and primary research are assembled to develop the Enhanced Renewable Energy Utilization EREU model for electricity generation in Thailand as the fundamental finding of this thesis and research project respectively
