Shared Services And Business Process Outsourcing In Germany:

Shared Services and Business Process Outsourcing in Germany Josefine Dutschmann,2010 **Creating Value in a Regulated World** Cedric Read,2006-11-02 This book is about championing a move away from simply evaluating physical assets to understanding and evaluating the intangible value of an entity It means moving beyond economic theory to reprioritise and change the organisation so that further value can be created via processes systems measures skills knowledge and strategy It is also about mapping the intangible value chain The book looks at value networks and using real life projects asks questions such as What do company value networks look like How are they used to create value How can one value the value chain What lessons can be learnt from companies with high value networks as opposed to companies with low value networks What is the impact on finance disciplines processes measures systems and skills These answers to these questions as provided by the case studies and interviews with CFOs from the companies involved will help to improve focus improve shareholder value improve transparency both internally and externally cut waste in the current decision support structure and prevent inadequate decision making and lost opportunity **International Management in Service Firms** Dirk Klimkeit,Pengji Wang,Huiping Zhang,2024-05-22 This textbook examines how service firms manage their international operations For the first time it brings together insights from the fragmented literature on this subject into an accessible textbook Further it is unique in its focus on service firms internationalization and international management Beginning with an overview of the international environment in which service firms operate it subsequently describes multinational service firms and their internationalization processes strategies and organization Unlike most texts on international services the book goes beyond internationalization to address the ongoing management of service firms It not only addresses functions such as global service marketing financial management and human resource management but also discusses aspects such as global account management global service delivery and international project management as well as the topical issue of managing distributed virtual teams A dedicated chapter focuses on offshore shared services and business process outsourcing These chapters are complemented by a discussion on international corporate governance and corporate social responsibility The book is intended for students preparing for international careers in the service sector Each chapter includes case studies illustrations highlighted definitions a chapter summary and exercises **Business, Technology, and Knowledge Management in Asia: Trends and Innovations** Ordóñez de Pablos, Patricia,2012-12-31 This book highlights the efforts and developments in the fields of Asian studies as well as its intentional role in IT and management within the constant growing business market Provided by publisher **Country Commerce** ,2004 *The Routledge Handbook of Financial Geography* Janelle Knox-Hayes,Dariusz Wójcik,2020-12-14 This handbook is a comprehensive and up to date work of reference that offers a survey of the state of financial geography With Brexit a global recession triggered by the COVID 19 pandemic as well as new financial technology threatening and promising to revolutionize finance the map of the financial

world is in a state of transformation with major implications for development. With these developments in the background, this handbook builds on this unprecedented momentum and responds to these epochal challenges, offering a comprehensive guide to financial geography. Financial geography is concerned with the study of money and finance in space and time and their impacts on economy, society, and nature. The book consists of 29 chapters organized in six sections: theoretical perspectives on financial geography, financial assets and markets, investors, intermediation, regulation and governance, and finance, development, and the environment. Each chapter provides a balanced overview of current knowledge, identifying issues and discussing relevant debates. Written in an analytical and engaging style by authors based on six continents from a wide range of disciplines, the work also offers reflections on where the research agenda is likely to advance in the future. The book's key audience will primarily be students and researchers in geography, urban studies, global studies, and planning, more or less familiar with financial geography who seek access to a state-of-the-art survey of this area. It will also be useful for students and researchers in other disciplines such as finance and economics, history, sociology, anthropology, politics, business studies, environmental studies, and other social sciences who seek convenient access to financial geography as a new and relatively unfamiliar area. Finally, it will be a valuable resource for practitioners in the public and private sector, including business consultants and policy makers who look for alternative approaches to understanding money and finance.

Modeling Economic Growth in Contemporary Slovakia Michael Augustin, Peter Jančovič, Bruno S. Sergi, 2024-11-15. This edited collection analyses various aspects of Slovakia's economy, including recent developments and events such as the COVID-19 pandemic and war in Ukraine, highlighting issues that arise from the current economic model, making it difficult for Slovakia to revitalize and adapt the economy to new circumstances.

Robotic Process Automation Christian Czarnecki, Peter Fettke, 2021-05-10. This book brings together experts from research and practice. It includes the design of innovative Robot Process Automation (RPA) concepts, the discussion of related research fields (e.g., Artificial Intelligence, AI), the evaluation of existing software products, and findings from real-life implementation projects. Similar to the substitution of physical work in manufacturing, blue-collar automation, Robotic Process Automation tries to substitute intellectual work in office and administration processes with software robots, white-collar automation. The starting point for the development of RPA was the observation that, despite the use of process-oriented enterprise systems such as ERP, CRM, and BPM systems, additional manual activities are still indispensable today. In the RPA approach, these manual activities are learned and automated by software robots, either by defining rules or by observing manual activities. RPA is related to business process management, machine learning, and artificial intelligence. Tools for RPA originated from dedicated stand-alone software. Today, RPA functionalities are also integrated into elaborated process management suites. From a conceptual perspective, RPA can be structured into input components (sensors, in the wide sense), an intelligence center, and output components (actuators, in the wide sense). From a strategic perspective, the impact of RPA can be related to the support of existing tasks, the complete

substitution of human activities and the innovation of processes as well as business models At present high expectations are related to the use of RPA in the improvement of software supported business processes Manual activities are learned and automated by software robots that interact with existing applications via the presentation layer In combination with artificial intelligence AI as well as innovative interfaces e g voice recognition RPA creates a novel level of automation for office and administration processes Its benefit potential reaches a return on investment ROI up to 800% that is documented in various case studies
