Devices Manufacturing Subcommittee on Commerce,2017-05-28 Wearable technologies have come to represent a growing  
segment within that digital ecosystem of interconnected devices and their applications and platforms The defining  
characteristic of wearables is that they offer consumers and businesses access to realtime highly personalized information  
through products and devices that are physically worn by the user Fitness tracking bands gather information about an  
individual s physical activity and are intended to motivate users to improve their fitness wellness and health regimens While  
inspiring better fitness habits is a positive use of wearable technology the societal and economic benefits of these products  
extends far beyond those applications The potential of wearable technology extends across multiple economic sectors and  
industries such as energy health care transportation retail professional sports manufacturing education and others In  
manufacturing for example wearables can provide businesses with greater insight into the daily operations of their  
production practices their workflows their supply chain processes The appeal of this technology is pervasive because of what  
it can offer in terms of operational efficiencies public safety improved performance and cost savings for every business type  
and size
