State Governance and Public Finance Theory Ma Jun, Gao Peiyong, 2025-03-31 This book explores the fundamental theories, methodologies, and innovative directions of public finance research, focusing on its relationship with and role in state governance. Public finance is the foundation and an important pillar of state governance. The two mutually reinforce each other at the macro level and in broader contexts, necessitating the reconstruction of a public finance discipline system that meets the needs of Chinese society. This book addresses key theoretical issues in public finance with its main discussions covering the need, feasibility, and direction of innovation in fundamental theory research. It approaches a multidisciplinary perspective, the history, progress, and future of public finance in China, the development of the discipline, and teaching approaches, research trends, quantitative research methods, and practical issues related to tax system reform. The title will be a valuable reference for researchers and students in the fields of public economics, public finance, Chinese fiscal policy, and tax system.

*Personal Transferable Skills in Accounting Education* Kim Watty, Beverley Jackling, Richard M.S. Wilson, 2014-07-16 The development of generic skills, often referred to as soft skills in accounting education, has been a focus of discussion and debate for several decades. During this time, employers and professional bodies have urged accounting educators to consider and develop curricula which provide for the development and assessment of these skills. In addition, there has been criticism of the quality of accounting graduates and their ability to operate effectively in a global economy. Embedding generic skills in the accounting curriculum has been acknowledged as an appropriate means of addressing the need to provide knowledge professionals to meet the needs of a global business environment. *Personal Transferable Skills in Accounting Education* illustrates how generic skills are being embedded and evaluated in the accounting curriculum by academics from a range of perspectives. Each chapter provides an account of how the challenge of incorporating generic skills in the accounting curriculum within particular educational environments has been addressed. The challenges involved in generic skills development in higher education have not been limited to the accounting discipline. This book provides examples which potentially inform a wide range of discipline areas. Academics will benefit from reading the experiences of incorporating generic skills in the
