The Theory of Problem-Solution Dualities and Polarities Kofi Kissi Dompere, 2022-04-25 This book is concerned with the development of the understanding of the relational structures of information knowledge decision choice processes of problems and solutions in the theory and practice regarding diversity and unity principles of knowing science non science and information knowledge systems through dualistic polar conditions of variety existence and nonexistence It is a continuation of the sequence of my epistemic works on the theories on fuzzy rationality info statics info dynamics entropy and their relational connectivity to information language knowing knowledge cognitive practices relative to variety identification problem solution dualities variety transformation problem solution dualities and variety certainty uncertainty principle in all areas of knowing and human actions regarding general social transformations It is also an economic theoretic approach in understanding the diversity and unity of knowing and science through neuro decision choice actions over the space of problem solution dualities and polarities The problem solution dualities are argued to connect all areas of knowing including science and non science social science and non social science into unity with diversities under neuro decision choice actions to support human existence and nonexistence over the space of static dynamic dualities The concepts of diversity and unity are defined and explicated to connect to the tactics and strategies of decision choice actions over the space of problem solution dualities The concepts of problem and solution are defined and explicated not in the space of absoluteness but rather in the space of relativity based on real cost benefit conditions which are shown to be connected to the general parent offspring infinite process where every solution generates new problems which then generates a search for new solutions within the space of minimum maximum dualities in the decision choice space under the principle of non satiation over the space of preference non preference dualities with analytical tools drawn from the fuzzy paradigm of thought which connects the conditions of the principle of opposites to the conditions of neuro decision choice actions in the zone of variety identifications and transformations The Monograph would be useful to all areas of Research Learning and Teaching at Advanced Stages of Knowing and Knowledge Production

Political Economy for Public Policy Ethan Bueno de Mesquita, 2016-09-06 The ideal introductory textbook to the politics of the policymaking process This textbook uses modern political economy to introduce students of political science government economics and public policy to the politics of the policymaking process The book's distinct political economy approach has two virtues By developing general principles for thinking about policymaking it can be applied across a range of issue areas It also unifies the policy curriculum offering coherence to standard methods for teaching economics and statistics and drawing connections between fields The book begins by exploring the normative foundations of policymaking political theory social choice theory and the Paretian and

utilitarian underpinnings of policy analysis It then introduces game theoretic models of social dilemmas externalities coordination problems and commitment problems that create opportunities for policy to improve social welfare Finally it shows how the political process creates technological and incentive constraints on government that shape policy outcomes Throughout concepts and models are illustrated and reinforced with discussions of empirical evidence and case studies This textbook is essential for all students of public policy and for anyone interested in the most current methods influencing policymaking today Comprehensive approach to politics and policy suitable for advanced undergraduates and graduate students Models unify policy curriculum through methodological coherence Exercises at the end of every chapter Self contained appendices cover necessary game theory Extensive discussion of cases and applications

Transitions Towards Sustainable Mobility Jo A.E.E. van Nunen,Paul Huijbregts,Piet Rietveld,2011-08-19 Delivering a sustainable transport system is not just a matter of adopting a number of technological innovations to improve performance in terms of people planet and profits A broader structural and societal transition is needed in technology as well as in institutions behavioural patterns and the economy as a whole In this broader view neither the free market nor the public sector will be the unique key player in making this transition happen Elements of such an approach are presented in this book in a number of domains integrating transport infrastructure and land use planning thus connecting fields that are rather unconnected in day to day policies experiments with dynamic transport optimization including reports on pilot projects to test the viability of transitions towards reliable transport systems describing a reversal from supply driven towards demand driven approaches and sustainable logistics and traffic management from local city distribution to global closed supply chain loops

Microeconomics R. Glenn Hubbard,Anne M. Garnett,Philip Lewis,Anthony Patrick O'Brien,2014-09-01 Microeconomics is the most engaging introductory economics resource available to students today Using real businesses examples to show how managers use economics to make real decisions every day the subject is made relevant and meaningful Each chapter of the text opens with a case study featuring a real business or real business situation refers to the study throughout the chapter and concludes with An Inside Look a news article format which illustrates how a key principle covered in the chapter relates to real business situations or was used by a real company to make a real business decision Solved problems in every chapter motivate learners to confidently connect with the theory to solve economic problems and analyse current economic events
