Introduction to Mathematical Programming Wayne L. Winston, 1991
Introduction to Mathematical Programming Benjamin Lev, Howard J. Weiss, 1982
Developments in Cognitive Radio Networks Bodhaswar TJ Maharaj, Babatunde Seun Awoyemi, 2021-07-14
This book provides holistic yet concise information on what modern cognitive radio networks are how they work and the possible future directions for them The authors first present the most generic models of modern cognitive radio networks taking into consideration their different architectural designs and classifications While the spectrum resource is shown to be the most important resource for the cognitive radio networks the book exposes the importance of the other resources that are needed to help drive the technology The book then discusses in depth the key tools such as optimization and queuing theory and techniques such as cooperative diversity and relaying that are being employed to formulate resource problems investigate solutions and interpret such solutions for useful and practical modern cognitive radio networks realization Further the book studies the impact of modern cognitive radio networks on other emerging technologies such as 5G Internet of Things and advanced wireless sensor networks and discusses the role that cognitive radio networks play in the evolution of smart cities and in the realization of a highly interconnected world In discussing the future of the cognitive radio networks the book emphasizes the need to advance new or improved tools techniques and solutions to address lingering problems in the aspects of resource realization and utilization network complexity network security etc which can potentially limit the cognitive radio networks in their stride to becoming one of the most promising technologies for the immediate and near future
Nonlinear Optimization William P. Fox, 2020-12-08
Optimization is the act of obtaining the best result under given circumstances In design construction and maintenance of any engineering system engineers must make technological and managerial decisions to minimize either the effort or cost required or to maximize benefits There is no single method available for solving all optimization problems efficiently Several optimization methods have been developed for different types of problems The optimum seeking methods are mathematical programming techniques specifically nonlinear programming techniques Nonlinear Optimization Models and Applications presents the concepts in several ways to foster understanding Geometric interpretation is used to re enforce the concepts and to foster understanding of the mathematical procedures The student sees that many problems can be analyzed and approximate solutions found before analytical solutions techniques are applied Numerical approximations early on the student is exposed to numerical techniques These numerical procedures are algorithmic and iterative Worksheets are provided in Excel MATLAB and Maple™ to facilitate the procedure Algorithms all algorithms are provided with a step by step format Examples follow the summary to illustrate its use and application Nonlinear Optimization Models and Applications Emphasizes process and interpretation throughout Presents a general classification of optimization problems Addresses situations that lead to models illustrating many types of optimization problems Emphasizes model formulations

Addresses a special class of problems that can be solved using only elementary calculus Emphasizes model solution and model sensitivity analysis About the author William P Fox is an emeritus professor in the Department of Defense Analysis at the Naval Postgraduate School He received his Ph D at Clemson University and has taught at the United States Military Academy and at Francis Marion University where he was the chair of mathematics He has written many publications including over 20 books and over 150 journal articles Currently he is an adjunct professor in the Department of Mathematics at the College of William and Mary He is the emeritus director of both the High School Mathematical Contest in Modeling and the Mathematical Contest in Modeling
