The Stem Cell Epistles Michael A. Buratovich, 2013-08-20 Human embryos it has been said have no muscles nerves digestive system feet hands face or brain they have nothing to distinguish them as a human being and if one of them died no one would mourn as they would for one of us Consequently early human embryos are being dismembered in laboratories around the world to produce embryonic stem cells which we are told are the tools that will lead to the next quantum leap in medicine Should Christians support such small sacrifices for something that might potentially relieve the suffering of millions or should we vigorously oppose it Developmental biologist and professor of biochemistry Michael Buratovich was asked such a question among others by his students This book contains his measured answers and provides support from the scientific literature to substantiate his claims He shows that embryonic stem cells are unnecessary since the renaissance in regenerative medicine is occurring largely without them Furthermore he sets forth the scientific and historic case that the embryo is the youngest and most vulnerable member of humanity and that ones such as these are precisely those whom the Christian church worked to protect in the past and should champion in the present      *Visual Education* ,1973 Beginning with 195 one monthly issue called Visual aids yearbook      **Grade Aid Workbook with Practice Tests** Denise Ann Bodman, Carol Lynn Martin, Richard Fabes, 2005-07-18      **McCary's Human Sexuality** James Leslie McCary, Stephen P.
