**The Big Book of Cyberpunk** Jared Shurin, 2023-09-26 A genre defining and redefining collection of the boldest most rebellious and most prescient speculative fiction featuring stories from all over the globe The sky above the port was the color of television tuned to a dead channel Almost forty years ago William Gibson wrote the line that began *Neuromancer* and a movement that would change the face of science fiction Award winning anthologist Jared Shurin brings together over a hundred stories from more than twenty five countries that both establish and subvert the classic cyberpunk tropes and aesthetic from gritty near future noir to pulse pounding action Urban rebels undermine monolithic corporate overlords Daring heists are conducted through back alleys and the darkest parts of the online world There s dangerous new technology cybernetic enhancements scheming AI corporate mercenaries improbable weapons and roguish hackers These tales examine the near now extrapolating the most provocative trends into fascinating and plausible futures We live in an increasingly cyberpunk world packed with complex technologies and globalized social trends A world so bizarre that even futurists couldn t explain it though many authors in this book have come closer than most As both an introduction to the genre and the perfect compendium for the lifelong fan *The Big Book of Cyberpunk* offers a hundred ways

to understand where we are and where we re going The MUP Encyclopaedia of Australian Science Fiction & Fantasy Sean McMullen,1998 This book covers all Australian science fiction and fantasy authors books and stories as well as important magazines sub genres and works published electronically Fifty Key Figures in Science Fiction Mark Bould,Andrew Butler,Adam Roberts,Sherryl Vint,2009-09-10 Fifty Key Figures in Science Fiction is a collection of engaging essays on some of the most significant figures who have shaped and defined the genre Diverse groups within the science fiction community are represented from novelists and film makers to comic book and television writers Important and influential names discussed include Octavia Butler George Lucas Robert Heinlein Gene Roddenberry Stan Lee Ursula K Le Guin H G Wells This outstanding reference guide charts the rich and varied landscape of science fiction and includes helpful and up to date lists of further reading at the end of each entry Available in an easy to use A Z format Fifty Key Figures in Science Fiction will be of interest to students of Literature Film Studies and Cultural Studies Strange Constellations Russell Blackford, Van Ikin, Sean McMullen,1999-05-30 Australia has long been thought of by Europeans as an exotic and mysterious land During the nineteenth century it was envisioned much as the moon and Mars are today a distant and uncharted place with hidden possibilities for explorations and adventures The continent captured the imagination of European writers in the 1800s and with its settlement Australia became the setting for tales of lost worlds and ancient civilizations Australia has since developed a rich national literature and perhaps because of its novelty and wilderness it has inspired numerous science fiction writers This book provides a critical survey of the history of Australian science fiction from its nineteenth century origins to the present The volume proceeds chronologically with an introductory section on the origins of Australian science fiction before 1925 It then turns to the rise of traditional science fiction in Australia from 1926 to 1959 with discussions of such writers as James Morgan Walsh Norma Hemming and Wynne Whiteford A section on the period from 1960 to 1974 examines the growing national recognition given to such Australian science fiction writers as David Rome and Jack Wodhams while a section on science fiction between 1975 and 1984 reviews the rise of small presses and the growth of literary criticism of the genre in Australia A final section addresses the maturation of Australian science fiction from 1985 to 1998 with attention to Aussiecon Two Extensive bibliographic information concludes the volume **Analog Science Fiction & Fact** ,1997 **Forthcoming Books** Rose Army,1997-12 *What Do I Read Next?* Neil Barron,2005-10-21 By identifying similarities in various books this annual selection guide helps readers to independently choose titles of interest published in the last year Each entry describes a separate book listing everything readers need to know to make selections Arranged by author within six genre sections detailed entries provide Title Publisher and publication date Series Names and descriptions of characters Time period and geographical setting Review citations Story types Brief plot summary Selected other books by the author Similar books by different authors Author title series character name character description time period geographic setting and genre sub genre indexes are included to facilitate research *Science Fiction & Fantasy Book*

*Review Annual* ,1991      *The Year's Best Science Fiction* ,2009      **Soundings** Gary K. Wolfe,2005 A collection of reviews by Gary Wolfe originally published in the British monthly magazine *Locus* from 1992 1996 Autographed by the author      *The Best of Greg Egan* Greg Egan,2019 Greg Egan is arguably Australia s greatest living science fiction writer In a career spanning more than thirty years he has produced a steady stream of novels and stories that address a wide range of scientific and philosophical concerns artificial intelligence higher mathematics science vs religion the nature of consciousness and the impact of technology on the human personality All these ideas and more find their way into this generous and illuminating collection the clear product of a man who is both a master storyteller and a rigorous exploratory thinker The Best of Greg Egan contains twenty stories and novellas arranged in chronological order and each of them is a brilliantly conceived painstakingly developed gem The book opens with Learning to be Me about a society in which the organic human brain can be replaced by a miraculous piece of technology called the jewel a mock brain that confers among other things a kind of immortality on its recipients Bit Players the opening movement in a trio of tales that continues with 3 adica and Instantiation posits a world in which cheaply generated software beings are exploited for the basest commercial purposes Other sets of interconnected stories all of them reprinted here include the mathematically themed Luminous and Dark Integers and a pair of stories centered on the complex marriage of a physicist and a mathematician Singleton and Oracle Reasons to be Cheerful concerns a young boy whose brain tumor has an unexpected effect on his life moods and view of the world Axiomatic tells the story of a society in which implants can be used to alter the human personality with potentially lethal results And the Hugo Award winning novella Oceanic is a powerful account of a boy whose deeply held religious beliefs are undermined by what he comes to learn about the laws of the physical world This book really does represent the best of Greg Egan      **Transrealist Fiction** Damien Broderick,2000-06-30 Transrealist writing treats immediate perceptions in a fantastic way according to science fiction writer and mathematician Rudy Rucker who originated the term In the expanded sense argued in this book it also intensifies imaginative fiction by writing the fantastic from the standpoint of richly personalized experience Transrealism is also related to slipstream writing another category introduced into studies of speculative fiction to account for texts that seem to follow trajectories mapped by the huge body of science fiction accumulated in the last century while retaining a central interest in traditional literary strategies This book examines a variety of work from the transrealist perspective something that has not been done previously It emphasizes the texts of Philip K Dick and Rucker himself while it additionally engages the texts of such slipstream writers as Kurt Vonnegut J G Ballard and John Barth It places its argument against the antihumanist trend in science fiction and builds comparisons with more traditional varieties of science fiction works      **American Book Publishing Record** ,1998      **Projections** Lou Anders,2004 Examines the history and people the science and the society the lives times and themes the cultural impact and the critical response of the dynamic genre that is speculative fiction      **Last Flesh** Christopher Dewdney,1998 On the brink of the transhuman age a dazzling disturbing gaze

from one of our most original thinkers. Last Flesh is about human transformation. It proposes that we are on the brink of the transhuman age, an era that will usher in the next stage in human evolution, the posthuman era. Last Flesh is a personal Renaissance look at this transitional period, its culture, media, and technology. The transhuman epoch will be heralded by an unprecedented expansion of human capabilities. Genetic engineering, cyberneurology, and artificial intelligence are about to give humans the keys to their own destiny. Voice recognition, computer-assisted literature, and art will provide a new cultural richness. At the same time, nanotechnology, robotics, and physics will produce astounding new advances in engineering. Last Flesh explores the impact, both social and moral, of these innovations. Why the increasing pace of technological obsolescence is good for us. Why our present concept of privacy must end if we are to flourish in the posthuman era. How the Internet is really the last flowering of private literature before the advent of voice recognition. How human consciousness will be uploaded into computers. An eclectic, free-ranging, and yet completely accessible interpretation of where we are and where we are going as a species. Last Flesh is both energizing and foreboding, a brilliant melange of culture and technology that will dazzle and disturb.
