the compendium will be a valuable document to consult for anyone aspiring to be an excellent manager or leader in their organisation *Developing Children as Researchers* Chae-Young Kim, Kieron Sheehy, Lucinda Kerawalla, 2017-03-21 Encouraging young children to create and carry out their own social research projects can have significant social and educational benefits. In addition, their research may help them to influence local and national policies and practices on issues that matter to them. To support this, *Developing Children as Researchers* acts as a practical guide to give teachers and other adults who work with children a set of structured, easy-to-follow session plans that will help children to become researchers in their own right. Comprising of ten session plans that have already been tried and tested in schools, this guide will assist you in supporting child researchers while helping you to develop the techniques for teaching research skills effectively. The session plans also ensure that children's views are heard and reflected by encouraging their active curiosity and investigation of issues that they may be concerned about. Forming a step-by-step guide, the ten sessions cover themes such as starting the research process and identifying a research topic, the three key principles of research: be sceptical, systematic, and ethical; choosing research participants and drawing up a research plan; the range of data collection and analysis methods; reporting the results of and reflecting upon a research project. Children's research has often depended upon the support of academic researchers to provide resources and training. By making the research training and facilitation process more widely accessible, this guide will help remove the psychological and practical hurdles that teachers and others who regularly work with children might feel about helping children's research themselves. *Critical Clinical Social Work: Counterstorying for Social Justice* Catrina Brown, Judy E. MacDonald, 2020-05-29 This edited collection offers an original critical clinical approach to social work practice written by social work educators from the School of Social Work at Dalhousie University and their collaborators. It provides a Canadian perspective on the diverse issues social workers encounter in the field, highlighting the practical application of feminist, narrative, anti-racist, and postcolonial frameworks. With the aim of producing counterstories that participate in social resistance, this volume focuses on integrating critical theory with direct clinical practice. Through the use of case studies, the contributors tackle a range of substantive issues including ethics, working with complex trauma, men's use of violence, substance use among women and girls, Indigenous social work praxis, critical child welfare approaches, counterstorying, experiences of disability, and animal-informed social work practice. *Encyclopedia of Applied Psychology* Charles Spielberger, 2004-09-02 Encompasses topics including aging, geropsychology, assessment, clinical, cognitive, community, counseling, educational, environmental, family, industrial, organizational, health, school, sports, and transportation psychology. Each entry provides a clear definition, a brief review of the theoretical basis, and emphasizes major areas of application. *The Normal School Child* R. S.
