Thompson, 2010-03-05 The present volume of *Research in Collegiate Mathematics Education* like previous volumes in this

series reflects the importance of research in mathematics education at the collegiate level The editors in this series

encourage communication between mathematicians and mathematics educators and as pointed out by the International

Commission of Mathematics Instruction ICMI much more work is needed in concert with these two groups Indeed editors of

RCME are aware of this need and the articles published in this series are in line with that goal Nine papers constitute this

volume The first two examine problems students experience when converting a representation from one particular system of

representations to another The next three papers investigate students learning about proofs In the next two papers the focus

is instructor knowledge for teaching calculus The final two papers in the volume address the nature of conception in

mathematics Whether they are specialists in education or mathematicians interested in finding out about the field readers

will obtain new insights about teaching and learning and will take away ideas that they can use
