Learning Cloud Computing Nuruzzaman Faruqi,Wahiduzzaman,2018-04-29 Internet and web has become more popular than ever And the popularity is growing day by day One of the main reasons this fast growing popularity is the availability of computing devices Especially hand held computing devices are playing the most effective role in changing the ways we live our lives Business education research treatment financial services and lot more services have turned into mobile device centric services As a result the amount of data to be handled by these small devices are expanding rapidly Which driving the focus from personal computing to datacenter based computing Datacenter based computing has transformed the computing model Today s computing model is

service oriented and deliver computing resources as utilities through network connectivity It has become similar to telephony electricity gas and water supply as utility Like these services IT services are delivered over computer network and billed according the consumption This utility oriented computing service model is cloud computing Cloud service providers offer different types of cloud services Cloud storage service computation application hosting web server etc are few of the common services of cloud computing Because of being comparatively new and a combination of multiple services cloud computing has become a buzzword in IT industry Service variations are not the only features of cloud computing which makes it a complex computing platform There are different service provisioning models as well Cloud services can be provisioned as infrastructure as a service platform as a service or application as a service Different service model reduces the cost of service by ensuring the clients are getting exactly what they need As a result huge amount of computing resource can be saved and of course can be used to serve other clients When users use personal computers most of the computing resources remain unused At the same time a huge amount of upfront cost is involved in using personal computers Moreover scalability is a major issue in personal computing As a result computing model is shifting from personal computing to datacenter based computing As computing era is entering into a new paradigm the demand of people expert in cloud computing rising As there is huge demand of people with skill in cloud computing universities should pay special attention to develop market oriented cloud skills in IT and CSE graduates However because of being a new and fast evolving technology understanding cloud computing requires more attention and well planned approach Otherwise learners may end up in frustration and confusion This book aims to represent the well planned approach to learn cloud computing This book has been designed in such a way that even learners who do not have technology based educational background will understand the concept of cloud computing without facing any difficulties or falling into any types of confusion
