Advanced Financial Accounting 10th Edition:

Advanced Financial Accounting Alessandro Cortesi, Patrizia Tettamanzi, Umberto Scaccabarozzi, Ivan Spertini, Stefano Castoldi, 2015-11-02T00:00:00+01:00 Financial statements are the cognitive instrument par excellence to understand a company's profitability, asset trends and financial performance. This volume is divided into three sections and addresses the main themes related to Financial Statements. The first part, Financial Statement analysis: Main objectives and tools, illustrates the techniques commonly used to analyse and interpret financial statements: reformulations of statement of financial position and statement of comprehensive income and ratios. The second part, IFRS Accounting issues, presents the accounting issues of the most significant financial statements: captions in accordance with International Financial Reporting Standards (IFRS) applicable on the date of publication of this manual. Consolidated financial statements are the subject of the third part, presenting the fundamental problems that gradually may arise from the consolidation process. The book is intended for all those students or professionals who intend to deal in a systematic way with the issues of construction and analysis of financial statements. The content of each chapter is enriched by examples with the aim of facilitating understanding.

Textbooks in Academic Libraries Chris Diaz, 2018-12-03 Shortly after the syllabi are posted and long before the beginning of the term, interlibrary loan departments at academic libraries will have filled or rejected innumerable textbook requests. While it would be unwise if not impossible to buy and circulate every textbook at a college or university, there are many academic libraries who are selectively adding textbooks to their collections. And the practice seems to be gaining momentum. In this volume, the Association for Library Collections and Technical Services (ALCTS) and editor Chris Diaz gather case studies that pull together creative approaches and best practices for print textbook reserve programs. This book discusses such topics as results and analysis from a detailed survey of a state university's core course textbook reserve program; funding sources for starting or piloting a program using aggregated enrollment, grade and textbook cost data to identify high impact courses; identifying course-related books that are in the library's collection or fit an existing collection policy; workflow for using bookstore data with ILS and purchasing systems; and using LibGuides and Google Sheets to publicize textbook holdings and how a back-end database supports discovery for students and reporting for reserves staff. A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks, and this book spotlights a variety of examples that can be used as models.

Advanced Management Accounting (Text, Problems & Cases) Jawahar Lal, This revised edition of *ADVANCED MANAGEMENT ACCOUNTING* provides a comprehensive and updated coverage of important topics, current trends, latest ideas and researches in management accounting.
