Biotechnology to Work National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Bioprocess Engineering, 1992-02-01 The ability of the United States to sustain a dominant global position in biotechnology lies in maintaining its primacy in basic life science research and developing a strong resource base for bioprocess engineering and bioproduct manufacturing This book examines the status of bioprocessing and biotechnology in the United States current bioprocess technology products and opportunities and challenges of the future and what must be done to meet those challenges It gives recommendations for action to provide suitable incentives to establish a national program in bioprocess engineering research development education and technology transfer **Bioprocess Engineering** Bjorn K. Lydersen, Nancy A. D'Elia, Kim L. Nelson, 1994-04-18 Divided into four sections the first and third reflect the fact that there are two types of equipment required in the plant one in which the actual product is synthesized or processed such as the fermentor centrifuge and chromatographic columns and the other that supplies support for the facility or process including air conditioning water and waste systems Part two describes such components as pumps filters and valves not limited to a certain type of equipment Lastly it covers planning and designing the entire facility along with requirements for containment and validation of the process **Biotechnology: Bioprocessing** Hans-Jürgen Rehm, Gerald Reed, 1991
