Contact Lens Practice Robert B. Mandell, 1988 **Technology Entrepreneurship in Theory and Practice** J. Mark Munoz, Orestis Terzidis, 2025-02-11 Technology entrepreneurship refers to business activities that are based on new scientific insights and new technical developments. It describes the process by which enterprising teams and individuals convert new technical knowledge into products and services. It encompasses entrepreneurial pursuits in all fields of engineering and science where progress opens novel ways of creating value. Often these activities are based on intellectual property, although it may also make sense to consciously pursue an open technology strategy. Entrepreneurial activities in these domains lead to ventures with specific characteristics. **Technology Entrepreneurship in Theory and Practice** compiles the essential research knowledge about principles and practices in technology entrepreneurship. Systematically presenting theory and practice for entrepreneurs coming from an engineering or scientific background, the authors assemble a comprehensive overview of the subject and enhance it with their expert viewpoints. The book compiles and summarizes available knowledge and approaches to enable engineers and scientists to develop entrepreneurial initiatives. **Technology Entrepreneurship in Theory and Practice** will find an audience among technology entrepreneurs, engineers and scientists, entrepreneurship educators, executives, consultants, and policymakers worldwide.

Innovation in the Anthropological Perspective Julia C. Gluesing, Christine Miller, Helga Wild, 2024-07-31 Innovation is a constant in human life and organization arising from within a context-based culture of social structures and beliefs. This book re-examines the processes, practices, and mechanisms of innovation from an anthropological perspective, offering a theory of innovation as a dynamic multidimensional system. It uses methods and stories across a broad arc of time, place, social, and cultural context and subject matter. The chapters explore the intersection of virtual, local, and global dynamics and deepen our understanding of aspects and dimensions of innovation that challenge common perceptions, particularly in business and organizational environments. The approach aims to situate innovation in an integrated view of human and non-human ecologies and to create common ground for a new form of research and practice.
