Magnetic resonance-guided focused ultrasound (MRgFUS) Francesca

Pistoia, Michele Tinazzi, Marc N. Gallay, 2025-09-25 Magnetic Resonance guided Focused Ultrasound MRgFUS is an innovative method of brain surgery that doesn't require opening the skull or penetrating the brain. Since the first study using MRgFUS in functional neurosurgery for neuropathic pain was published in 2009, there has been significant progress worldwide. The European CE mark for using the transcranial focused ultrasound system ExAblate Neuro (Insightec Ltd) to treat neurological disorders in the brain, including essential tremor, Parkinson's disease-related tremor, and neuropathic pain, was awarded in 2012. In 2016, the US Food and Drug Administration (FDA) approved it for the treatment of medically refractory essential tremors or Parkinson-related tremors. Since then, the worldwide adoption of MRgFUS as a new treatment modality against tremors has been incredibly fast indeed. Compared to other techniques that involve cerebral penetration, MRgFUS has high targeting accuracy and a low side effect profile. With targeting accuracy within one millimeter and no brain shift, this technique reduces the risk of placing a thermolesion away from the intended target. Additionally, intraoperative clinical assessments can be performed on awake patients to assess the clinical efficacy and potential side effects.

Essentials of Surgery S. B. Agarwal, 1998 Marketing Health Services, Fifth Edition Richard K. Thomas, PhD, 2024-05-30 Instructor Resources Test bank PowerPoint slides instructor's manual with additional case studies and discussion questions and a transition guide to the new edition. Healthcare marketing is like marketing in other sectors, but it also has characteristics that differentiate it. It has evolved into a unique discipline with features that set it apart from marketing in other sectors. Drawing from the author's many years of real-world experience, *Marketing Health Services* provides a foundational understanding of the specialized field of healthcare marketing. It delves into the complexities of healthcare markets, explains both traditional and modern marketing techniques geared to healthcare use, and offers guidance on the implementation and evaluation of marketing initiatives. This fifth edition reflects the impact of the COVID-19 pandemic and the momentum it has provided for emerging developments in healthcare, including pay-for-performance, population health management, and telehealth. In addition to updated statistics and new sidebars, this edition includes new and expanded coverage of the following subjects: Behavior patterns of healthcare consumers; Sources of information for healthcare consumers; Community needs assessments and how they shape strategy; Social media as a vital communication and marketing tool; The growing number of resources available to healthcare marketers. *Marketing Health Services* will help current and aspiring healthcare managers understand the unique demands facing healthcare marketers and the strategies of healthcare marketing for facing these challenges.

Medical evacuation in emergencies World Health Organization, 2025-07-04 In times of crisis, whether due to disasters, armed conflicts, or other health emergencies, the timely and well-coordinated evacuation of patients is a critical component of emergency response. Past emergencies have demonstrated the urgent need for standardized approaches to both pre-hospital support for medical evacuation (medevac) and medevac operations themselves. The absence of clear protocols, coupled with delays, miscommunication, and inadequate care during transit, can

severely impact patient outcomes Establishing standardized procedures ensures that medical evacuations are conducted safely efficiently and in coordination with the broader health care and emergency response system This guidance aims to provide a comprehensive framework for the safe and context adapted coordination clinical care operations support and logistics relevant to governments national authorities including ministries of health civil protection and civil defence national and international Emergency Medical Teams EMTs nongovernmental organizations NGOs Emergency Medical Services EMS and other key stakeholders operating in the medevac space or wishing to build this kind of capacity It defines minimum standards and recommendations for the development and classification of respective specialized care teams SCTs This is particularly relevant for contexts without pre existing or functional prehospital or medevac systems and can support country level capacity building regional and sub regional planning and the development of SCTs Micromovement in Orthopaedics
