Chemical Principles Peter Atkins, Loretta Jones, 2007-08 Written for calculus inclusive general chemistry courses Chemical Principles helps students develop chemical insight by showing the connections between fundamental chemical ideas and their applications Unlike other texts it begins with a detailed picture of the atom then builds toward chemistry's frontier continually demonstrating how to solve problems think about nature and matter and visualize chemical concepts as working chemists do Flexibility in level is crucial and is largely established through clearly labeling separating in boxes the calculus coverage in the text Instructors have the option of whether to incorporate calculus in the coverage of topics The multimedia integration of Chemical Principles is more deeply established than any other text for this course Through the unique eBook the comprehensive Chemistry Portal Living Graph icons that connect the text to the Web and a complete set of animations students can take full advantage of the wealth of resources available to them to help them learn and gain a deeper understanding

Inverters and AC Drives Narayanaswamy P.R. Iyer, 2024-12-26 Successful development of power electronic converters and converter fed electric drives involves system modeling analyzing the output voltage current electromagnetic torque and machine speed and making necessary design changes before hardware implementation Inverters and AC Drives Control Modeling and Simulation Using Simulink offers readers Simulink models for single multi triangle carrier selective harmonic elimination and space vector PWM techniques for three phase two level multi level including modular multi level Z source Quasi Z source switched inductor switched capacitor and diode assisted extended boost inverters six step inverter fed permanent magnet synchronous motor PMSM brushless DC motor BLDCM and induction motor IM drives vector controlled PMSM IM drives direct torque controlled inverter fed IM drives and fuzzy logic controlled converter fed AC drives with several examples and case studies Appendices in the book include source codes for all relevant models model projects and answers to selected model projects from all chapters This textbook will be a valuable resource for upper level undergraduate and graduate students in electrical and electronics engineering power electronics and AC drives It is also a hands on reference for practicing engineers and researchers in these areas

Advances in agri-food robotics Professor Eldert van Henten, Professor Yael Edan, 2024-03-26 Provides a comprehensive review of the recent advances in agricultural robotics such as advances in sensing and perception as well as technologies and actuation Addresses our understanding of the social ethical and economic aspects of agricultural robotics including the regulatory frameworks and standards required to authorise their adoption Provides examples of the practical application of agricultural robotics in an array of agricultural settings from greenhouse and orchard cultivation to meat fish processing
