Cyber Situational Awareness Sushil Jajodia, Peng Liu, Vipin Swarup, Cliff Wang, 2009-10-03 Motivation for the Book This book seeks to establish the state of the art in the cyber situational awareness area and to set the course for future research A multidisciplinary group of leading researchers from cyber security cognitive science and decision science areas elaborate on the fundamental challenges facing the research community and identify promising solution paths Today when a security incident occurs the top three questions security administrators would ask are in essence What has happened Why did it happen What should I do Answers to the first two questions form the core of Cyber Situational Awareness Whether the last question can be satisfactorily answered is greatly dependent upon the cyber situational awareness capability of an enterprise A variety of computer and network security research topics especially some systems security topics belong to or touch the scope of Cyber Situational Awareness However the Cyber Situational Awareness capability of an enterprise is still very limited for several reasons Inaccurate and incomplete vulnerability analysis intrusion detection and forensics Lack of capability to monitor certain microscopic system attack behavior Limited capability to transform fuse distill information into cyber intelligence Limited capability to handle uncertainty Existing system designs are not very friendly to Cyber Situational Awareness

Handbook of Database Security Michael Gertz, Sushil Jajodia, 2007-12-03 Handbook of Database Security Applications and Trends provides an up to date overview of data security models techniques and architectures in a variety of data management applications and settings In addition to providing an overview of data security in different application settings this book includes an outline for future research directions within the field The book is designed for industry practitioners and researchers and is also suitable for advanced level students in computer science [Advances in Database Technology - EDBT 2000](#) Carlo Zaniolo, Peter C. Lockemann, Marc H. Scholl, Torsten Grust, 2003-06-26 EDBT 2000 is the seventh conference in a series dedicated to the advancement of database technology This year's conference special theme Connect Millions of Users and Data Sources underscores the importance of databases for the information age that is dawning with the new millennium The importance rises not just from the observation that the information age essentially rests on the convergence of communications computing and storage Equally important many of the concepts and techniques underlying the success of database systems have independent meaning and impact for today's distributed information systems The papers in the volume should also be seen in this light The EDBT 2000 conference program includes 30 research papers selected by the program committee out of 187 submissions covering advances in research development and applications of databases The conference program also includes six industry and applications papers a panel discussion six tutorials and several software demonstrations The conference features three distinguished invited speakers Ashish Gupta discusses database issues in electronic commerce Stefano Ceri addresses the impact and challenges of XML on databases and Andreas Reuter shares his views on new perspectives on database technology The technical contributions presented at the EDBT 2000 conference are

collected and preserved in this volume that we are pleased to present to you with the expectation that it will serve as a valuable research and reference tool in your professional life
