Process of occupational therapy service delivery

The occupational therapy process is facilitated by the distinct perspective of occupational therapy practitioners engaging in professional reasoning, analyzing occupations and activities, and collaborating with clients. Service delivery does not occur in a linear fashion. It is a dynamic and fluid process that allows occupational therapy practitioners to focus on identified outcomes while continually reflecting on and accommodating new developments and insights throughout the service delivery process.

Evaluation

- **Occupational profile:** The occupational therapist summarizes information related to the client's occupational history, experiences, daily living patterns, interests, values, needs, contexts, and reasons for seeking services.
- **Analysis of occupational performance:** After obtaining a thorough occupational profile, the occupational therapist identifies the client's assets, limitations, and potential problems through observation and assessment of the client's performance.
- **Synthesis of the evaluation process:** The occupational therapist interprets the information gathered from the occupational profile and the analysis of occupational performance to determine priorities for intervention and outcomes, working collaboratively with the client to create goals.

Intervention

- **Intervention plan:** The occupational therapy practitioner integrates information from the evaluation with theory, practice models, frames of reference, and research evidence to develop an action plan for addressing targeted goals and outcomes in collaboration with the client.
- **Intervention implementation:** The occupational therapy practitioner implements the action plan and continually monitors the client's response to interventions, which may include the therapeutic use of occupations and activities, interventions to support occupations, education, training, advocacy, self-advocacy, group intervention, or virtual intervention.
- **Intervention review:** The occupational therapy practitioner reviews the effectiveness of the intervention plan and the client's progress toward targeted goals and outcomes.

Outcomes

- **Selecting outcome measures:** The occupational therapist selects valid, reliable methods to measure any of the following targeted outcomes: occupational performance, prevention, health and wellness, quality of life, participation, role competence, well-being, or occupational justice.
- **Measuring progress and adjusting goals and interventions:** Throughout the occupational therapy process, the practitioner uses the selected outcome measures to monitor progress, update goals, modify interventions, and plan for transition and/or discontinuation of occupational therapy services.

Occupational Therapy Documentation Templates:

Templates for Documentation in Occupational Therapy Lyndsey Jarvis, 2023 Templates for Documentation in Occupational Therapy is a guidebook for occupational therapists looking to optimize treatment time by streamlining the charting process. This book provides a collection of customizable templates for different types of documentation commonly used in hospitals, skilled nursing facilities, home health, and out-patient settings. It contains a wide range of templates that can be utilized for evaluations, general treatment encounter notes, frequently used therapeutic activities, discharge summaries, and more. Each template is designed to be user-friendly and adaptable to individual patients and various practice settings. Producing high-quality documentation hinges on the ability to identify and articulate the interplay between underlying impairment, functional limitations, and specific OT intervention. However, the documentation process can often feel insurmountable due to the impractical amount of time and effort required to capture this essential information. Fortunately, Templates for Documentation in Occupational Therapy offers valuable tools for optimizing the documentation process, helping clinicians streamline their workflows and focus on providing high-quality care to their patients rather than spending hours on paperwork. It is an essential resource for students, new graduates, and experienced occupational therapists alike who want to enhance the quality and efficiency of their documentation.
