

OpenWrt Development Guide

This document describes the development process for OpenWrt. It covers the build system, the package management system, and the various tools and utilities used in the development process.

OpenWrt Development Environment

OpenWrt development is done in a collection of tools and utilities. The development environment consists of a Linux host, a build system, a package management system, and various tools and utilities. The build system is responsible for building the OpenWrt firmware, and the package management system is responsible for managing the OpenWrt packages. The development environment is described in detail in the following sections.

Figure 1: OpenWrt development environment tree structure in the source directory.

- tools: contains all the tools and utilities used in the development process.
- buildtools: contains all the build tools and utilities, including the compiler, linker, and various utilities.
- packages: contains all the OpenWrt packages, including the kernel, libraries, and various utilities.
- scripts: contains all the scripts used in the development process, including the build scripts and various utilities.
- target: contains all the target-specific files, including the kernel, libraries, and various utilities.
- package: contains all the OpenWrt packages, including the kernel, libraries, and various utilities.
