Statistics in Scientific Investigation Glen McPherson, 2013-03-09 In this book I have taken on the challenge of providing an insight into Statistics and a blueprint for statistical application for a wide audience For students in the sciences and related professional areas and for researchers who may need to apply Statistics in the course of scientific experimentation the development emphasizes the manner in which Statistics fits into the framework of the scientific method Mathematics students will find a unified but non mathematical structure for Statistics which can provide the motivation for the theoretical development found in standard texts on theoretical Statistics For statisticians and students of Statistics the ideas contained in the book and their manner of development may aid in the development of better communications between scientists and statisticians The demands made of readers are twofold a minimal mathematical prerequisite which is simply an ability to comprehend formulae containing mathematical variables such as those derived from a high school course in algebra or the

equivalent a grasp of the process of scientific modeling which comes with either experience in scientific experimentation or practice with solving mathematical problems

The Problem of Moments James Shohat, James Alexander Shohat, Jacob David Tamarkin, 1950 Presents the development of the classical problem of moments for the first 50 years after its introduction by Stieltjes in the 1890s This book discusses the initial developments by Stieltjes Markov and Chebyshev and later contributions by Hamburger Nevanlinna Hausdorff and Stone
