Environmental Engineering Problems and Solutions Harry S. Harbold, 2000 Environmental Management Louis Theodore, R. Ryan Dupont, Terry E. Baxter, 1998-05-29 There is a growing need to support undergraduate educators in the development of environmental management educational materials. Recognizing this need, the National Science Foundation funded a College Faculty Workshop on Environmental Management that was conducted at Utah State University in July and August 1996. The principle objectives of the seminar were 1) to provide a meaningful course which would generate new ideas and innovative educational approaches in the emerging field of environmental management and 2) to develop an applications oriented problem workbook which would support undergraduate faculty involvement in the production of course materials. The result of this effort is *Environmental Management Problems and Solutions*, an informative text on the essentials of environmental management. More than 200 structured problems presented in the book are meant to elicit a sound understanding of the basics of environmental monitoring, assessment, and control. Detailed solutions to each problem provided with each chapter will prove useful to both the student and the instructor. This innovative text is a valuable resource for anyone involved in training of engineers and scientists in the field of environmental engineering.
