Econometrics, Statistics And Computational Approaches In Food And Health Sciences Alok Bhargava, 2006-11-03 This book is a compendium of Alok Bhargava's most important contributions in longitudinal econometric methods and its application to problems of food nutrition and health. It demonstrates the usefulness of rigorous econometric and statistical methods in addressing issues of under nutrition and poor child health in developing countries as well as obesity in developed countries. The close connection between the issues and themes analyzed in disciplines such as economics, nutrition, psychology, demography, epidemiology and public health provides a sound basis for the formulation of public policies.

Environmental Pollution Vijay P Singh, Shalini Yadav, Ram Narayan Yadava, 2017-12-29 This book comprises select proceedings of the International Conference on Water Environment Energy and Society. The book is divided into five parts. The first part deals with some aspects of environmental pollution such as socio-economic environment assessment for sustainable development, environmental issues due to fire in coal mines and its impact and suggestions for implementing precautionary and control measures, redevelopment of urban slum dwellings, issues, challenges, air and noise pollution in mega cities, importance of indoor environmental quality in green buildings. Part II discusses pollution indicators such as assessment and prediction of environmental noise, fuzzy logic based performance evaluation, fish biodiversity and its periodic reduction, effects of anthropogenic activities on fresh water ecosystems and monitoring of air pollution. Part III focuses on generation of pollution, namely biomedical waste generation and management, heavy metal leaching, etc. Water quality assessment is described in Part IV. The Part V presents water quality modeling. The book will be of interest to researchers and practitioners in the field of water resources, hydrology, environmental resources, agricultural engineering, watershed management, earth sciences as well as those engaged in natural resources planning and management. Graduate students and those wishing to conduct further research in water and environment and their development and management will also find the book to be of value.
