It covers interdisciplinary research subjects relating to scientific computing, aerodynamics, aeroacoustics, material sciences, aircraft structures, and flight mechanics. The respective chapters are based on papers presented at the Final Symposium of the Collaborative Research Center CRC 880 which was held on December 17-18, 2019 in Braunschweig, Germany. The conference and the research presented here were partly supported by the CRC 880 on Fundamentals of High Lift for Future Civil Aircraft funded by the DFG German Research Foundation. The papers offer timely insights into high lift technologies for short take-off and landing aircraft with a special focus on aeroacoustics, efficient high lift flight dynamics, and aircraft design.

Yaros, 1998 This white paper addresses the subject of Synergistic Airframe Propulsion interactions and integrations. The benefits of SnAPII have not been as extensively explored. This is due primarily to the separateness of design process for airframes and propulsion systems with only unfavorable interactions addressed. The question: How to design these two systems in such a way that the airframe needs the propulsion and the propulsion needs the airframe is the fundamental issue addressed in this paper. Successful solutions to this issue depend on appropriate technology ideas. This

paper first details some ten technologies that have yet to make it to commercial products with limited exceptions and that could be utilized in a synergistic manner Then these technologies either alone or in combination are applied to both a conventional two engine transonic transport and to an unconventional transport the Blended Wing Body Lastly combinations of these technologies are applied to configuration concepts to assess the possibilities of success relative to five of the ten NASA aeronautics goals These assessments are subjective but they point the way in which the applied technologies could work together for some break through benefits Government Reports Announcements ,1975 Journal of the Japan Society for Aeronautical and Space Sciences ,
