sensors covers the broad complexity of sensing sensor types and the vast range of existing and emerging applications in a very clearly written and accessible manner. It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud based big data analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present. It really brings this home through the use of carefully chosen case studies that bring the overwhelming concept of big data down to the personal level of individual life and health. Dermot Diamond, Director National Centre for Sensor Research, Principal Investigator CLARITY Centre for Sensor Web Technologies, Dublin City University. Sensor Technologies: Healthcare, Wellness and Environmental Applications takes the reader on an end to end journey of sensor technologies covering the fundamentals from an engineering perspective, introducing how the data gleaned can be both processed and visualized, in addition to offering exemplar case studies in a number of application domains. It is a must read for those studying any undergraduate course that involves sensor technologies. It also provides a thorough foundation for those involved in the research and development of applied sensor systems. I highly recommend it to any engineer who wishes to broaden their knowledge in this area. Chris Nugent, Professor of Biomedical Engineering, University of Ulster.

C# Deconstructed Mohammad Rahman, 2014-09-30. C Deconstructed answers a seemingly simple question: Just what is going on exactly when you run C code on the .NET Framework? To answer this question, we will dig ever deeper into the structure of the C language and the onion skin abstraction layers of the .NET Framework that underpins it. We'll follow the execution thread downwards, first to MSIL (Microsoft Intermediate Language), then down through just-in-time compilation into Machine Code, before finally seeing the results executed at the hardware level. The aim of this deep dive is to provide you with a much more rounded knowledge of the environment within which your code exists. As a managed language, it's best practice to let the Framework deal with device interaction, but you'll find the experience of taking the cover off once in a while a very rewarding one that will greatly enrich your appreciation of the C language and the way in which it functions.
