Forthcoming Books Rose Army,2001-08 [Compliance Management in Financial Industries](#) Mathias Eggert,2014-01-08

Since the peak of the world financial crisis in 2008 compliance management has gained more and more interest from practice and research In particular the financial service industry is strongly regulated and has to follow specific laws standards and guidelines Considering the steadily increasing number of legal requirements in the design of information systems is a challenge to financial service providers This book investigates the challenges of compliance management in financial industries and provides solutions for a compliant design of information models From a business process perspective an approach is presented that enables the automatic checking of business process models From a supervisory reporting perspective a modeling technique is presented that allows for modeling regulatory data warehouse requirements as well as its analysis Besides these two perspectives the author provides insights into the perceived relationship of Information Systems and Law

Advanced Digital Architectures for Model-Driven Adaptive Enterprises Kulkarni, Vinay,Reddy, Sreedhar,Clark, Tony,Barn, Balbir S.,2020-04-03 The five digital forces mobility and pervasive computing cloud big data artificial intelligence and robotics and social media are poised to bring great academic and industrial breakthroughs All stakeholders want to understand how to best harness these forces to their advantage While literature exists for understanding each force independently there is a lack of knowledge on how to utilize all the forces together to realize future enterprises *Advanced Digital Architectures for Model Driven Adaptive Enterprises* is an essential reference source that explores the potential in unifying the five digital forces to achieve increased levels of agility efficiency and scale Featuring coverage on a wide range of topics including socio technical systems adaptive architectures and enterprise modeling this book is ideally designed for managers executives programmers designers computer engineers entrepreneurs tool builders digital practitioners researchers academicians and students at the graduate level

Visualization in Modern

Cartography Alan M. MacEachren,David Ruxton Fraser Taylor,1994 *Visualization in Modern Cartography* explores links between the centuries old discipline of cartography and today s revolutionary developments in scientific visualization The book has three main goals 1 to pass on design and symbolization expertise to the scientific visualization community information that comes from centuries of pre computer visualization by cartographers and their more recent experiences with computerizing the discipline 2 to help cartographers cope with the dramatic shift from print cartography to a dynamic virtual cartography for which their role is changing from that of map designer to one of spatial information display and or interface designer 3 to illustrate the expanded role for cartography in geographic environmental planning and earth science applications that comes with the development of interactive geographic visualization tools To achieve these goals the book is divided into three parts The first sets the historical cognitive and technological context for geographic cartographic visualization tool development The second covers key technological symbolization and user interface issues The third provides a detailed look at selected prototype geographic cartographic visualization tools and their applications
