Environmental Politics and Foreign Policy Decision Making in Latin America Amy Below,2014-12-05 Although the Kyoto Protocol an international agreement to address global climate change has been regarded by many as an unsuccessful treaty both politically and environmentally it stands as one of the world s few truly global agreements Why did such a diverse group of countries decide to sign and or ratify the treaty Why did they choose to do so at different times and in different ways What explains their foreign policy behavior Amy Below s book builds off the increasing significance of climate change and uses the Kyoto Protocol as a case study to analyze foreign policy decision making in Latin America Below s study takes a regional perspective in order to examine why countries in Latin America made disparate foreign policy choices when they were faced with the same decision The book looks at the decisions in Argentina Mexico and Venezuela via a process tracing method Below uses information obtained from primary and secondary documents and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of Conference of the Parties speeches by presidents and country delegates The book complies with convention in the field by arguing that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables Environmental Politics and Foreign Policy Decision Making in Latin America considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory The book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics

Unnatural States Peter Ian Lomas, 2017-09-08 Unnatural States is a radical critique of international theory in particular of the assumption of state agency that states act in the world in their own right Peter Lomas argues that since the universal states system is inequitable and rigid and not all states are democracies anyway this assumption is unreal and to adopt it means reinforcing an unjust status quo Looking at the concepts of state nation and agency Lomas sees populations struggling to find an agreed model of the state owing to inherited material differences and unsurprisingly among theorists of the nation only controversy and a great confusion of terms Meanwhile the functional incarnations of the state agent are caricatures the mandarin state the lawyer state the landlord state the heir to history state and the patriot state Yet recent developments in international theory constructivism scientific realism postmodernism sacrifice state agency only at the price of an unhelpful abstraction The states system is dysfunctional and obsolete Lomas contends and international theory must be recast with morality as central to inspire and to guide historic change He focuses in his conclusion on prescriptions for change led by four moral concerns human rights weapons of mass destruction relations between rich and poor societies and the environment I begin this book writes Lomas with the commonest commonplace of international theory to expose it as a meaningless cliché In the masterly hands of Hobbes it was elaborated into a shock formula for organized society a reading of history as civilization's failure Kant sought to rescue morality from Hobbes and create the structures of modernity but Kant's influence is coming to an end In the Cold War politicians disagreeing over another philosopher almost brought the world to an end Hence the challenges of our time These are primary and profound Philosophers have done much to define the modern world The point of international theory is to change it
