Factors Influencing Adoption and Policy Implications Moazam Ali,2024-06-18 Doctoral Thesis Dissertation from the year 2024 in the subject Business economics Project Management grade 3 7 British University in Dubai course Project Management language English abstract The purpose of this study is to examine people s perceptions about the use of smart contracts through blockchain technology for public procurement in the United Arab Emirates UAE The research integrates the Technology Acceptance Model TAM the Technology Organization

Environment TOE framework and the Innovation Diffusion Theory IDT to develop a conceptual framework for understanding the factors that influence the behavioral intention to adopt smart contracts in the public procurement process The study employs a quantitative research methodology Data was collected through a survey questionnaire distributed to key stakeholders involved in public procurement including government officials suppliers and citizens The survey instrument measured constructs such as relative advantage complexity trialability observability perceived compatibility perceived enjoyment technology awareness perceived risk perceived efforts and perceived constraints from suppliers regulations and business partners The findings reveal that relative advantage trialability observability perceived compatibility perceived enjoyment and technology awareness have a significant positive influence on the behavioral intention to adopt smart contracts in public procurement Conversely complexity perceived risk and perceived constraints from suppliers regulations and business partners have a significant negative influence on the behavioral intention The results also indicate that the TAM model moderates the relationships between the various factors and behavioral intention

Model Structure for Block Chain Technology and Cryptocurrency for the Financial Services Sector in Zimbabwe Gabriel Kabanda,2021-09-13 Academic Paper from the year 2021 in the subject Computer Sciences Cryptocurrency grade 1 0 language English abstract The study was purposed to develop the model structure for Blockchain technology and cryptocurrency and determine the factors that influence the adoption of Blockchain technology and cryptocurrency in Zimbabwe in order to make value adding contributions to the cybersecurity risk management of the financial services sector Cybersecurity is the collection of policies techniques technologies and processes that work together to protect the confidentiality integrity and availability of computing resources networks software programs and data from attack Cybersecurity threats have thus shifted from the cryptocurrency to attacking platforms using the cryptocurrency such as crypto exchanges Essentially there would be no bitcoin without Blockchain but Blockchain exists without bitcoin The entire system works with a distributed ledger technology that operates on a decentralized pattern The blockchain is distributed and highly available exhibits irreversibility and immutability and eliminates intermediaries in banking sector For the Blockchain to function fully it requires components such as the Node Transaction Block as a data structure Chain of the blocks Miners to perform the block verification process and Consensus consensus protocol The Mixed Method methodology was used The research utilized focus groups and document analysis to gather knowledge on the subject A survey was conducted which included distribution of questionnaires and conducting interviews with heads of the banking sector

Blockchain Technology Compliance with the European Union (EU) General Data Protection Regulation (GDPR) Oliver Zeidler,2020-09-04 Essay from the year 2020 in the subject Computer Sciences Internet of Things IOT grade 1 0 Oxford University Faculty of Law language English abstract In this essay I will argue that the GDPR is slowing down technology progress in the EU with respect to the Blockchain technology The blockchain is of particular interest to me as I detected the potential legal issues and impact of blockchain technology

within my professional work I identified several legal ramifications in different fields of law that I believe will raise major problems in the near future Moreover it is not currently certain how United Kingdom will treat the international law internally after Brexit as Article 3 GDPR is limiting the spatial application area to the European Union and processes taking place in this terrain I will outline these problems here

Blockchain-based Digital Twins. Requirements and Design Decisions for the Data Storage Tobias Heinrich,2023-01-12 Master s Thesis from the year 2022 in the subject Computer Science Miscellaneous University of Hohenheim language English abstract The following research goal is the development of design decisions for the blockchain based storage of digital twin data The digital twin can be deployed in almost every industry and is able to represent any object being process or organisation The resulting benefits are versatile and can encompass a higher transparency and efficiency cost reduction or the enabling of completely new functions such as the virtual commissioning Digital twins do even contribute to a sustainable industrial production as they enable a corresponding reduction of the primary energy emissions of up to eight percent Due to this substantial added value digital twins pertain to the top ten strategic technology trends and are expected to reach a market size of over 48 billion USD by 2026 The existence of digital twins is strongly dependent on its underlying data for which reason the data storage is of fundamental importance for the operation of this technology In the past the digital twin concept mostly relied upon a traditional storage infrastructure in form of databases or clouds However digital twins and its data storage face major challenges e g through a more and more connected world and therefore an increasing number of potential participants and data volume or as a consequence of growing data security related risks Furthermore potential digital twin use cases entail varying conditions for which reason alternative storage solutions must be assessed The blockchain technology might constitute a possible alternative to realize the storage of digital twin data Through the novel and nearly unique characteristics such as immutability decentralisation or manipulation safety blockchains could introduce new opportunities to address digital twin use cases Those characteristics seem relevant at first sight as the application areas of digital twins become more manifold especially as the digital twin concept evolves from a descriptive to a rather actionable approach and include more critical data How the blockchain technology can actually deal with the requirements for the data storage including the abovementioned challenges must therefore be evaluated in order to facilitate their interplay and potentially achieve their full potential Hereby at first the data storage in digital twins must be understood comprehensively to assess the suitability of their deployment

Gender Gap in Blockchain Systems Amanda Van Annan,2025-10-14 Master s Thesis from the year 2024 in the subject Computer Science Internet New Technologies grade 1 5 course MBA language English abstract Blockchain focuses on using digital systems to execute and record online transactions that can only be perceived or considered as the building blocks developed from digital algorithms and secured through cryptography This technology system is one of the key strategic technology trends used in various organizations or public sectors to record transactions The problem at hand is the gender gap within the blockchain

industry where African American women are underrepresented and face various challenges in their pursuit of opportunities and advancement. Despite the increasing interest in blockchain technology, the participation of women in the industry remains significantly lower compared to their male counterparts. This gender disparity not only limits the diversity of talent and ideas within the industry but also hinders the industry's overall growth, innovation, and potential for positive social impact. Existing studies on gender gaps in technology fields, while valuable, often provide a limited understanding of the specific dynamics and challenges within the blockchain industry. There is a need for focused research that examines the gender gap in blockchain systems and investigates the unique factors that contribute to women's underrepresentation. This study aims to fill this gap by investigating the gender gap in blockchain systems, focusing on African American women's perspectives and their involvement in blockchain technology. By addressing this research gap, we can gain insights into the barriers African American women face in the industry and identify strategies to foster a more inclusive and equitable blockchain ecosystem.

The general research question is: What are the potential factors that lead to the gender gap in blockchain systems among African American women in the US who are influencers in the blockchain space? The sub-research questions are: How does race influence gender inequality in blockchain technology change among African American women in the US? How do trust and transparency influence the leadership position of African American women in the blockchain system? What are the key strategies or success factors to promote future gendered leadership in blockchain systems?

The Cryptocurrency Bitcoin And Causal Effects Of Market Volatility Gabriele Pauliuk, 2020-05-12. Academic Paper from the year 2018 in the subject Economics: Monetary theory and policy, grade 9-10. International School of Management Campus Munich course: Financial Geography, language: English. abstract: This work is about bitcoin and illegal trading, as well as fluctuations and the causal effect of it. The recent emergence of new technologies in the financial sector and virtual communities lead to new types of transactions and started questioning the relevance of financial centers around the world. The main reason for the emergence of virtual currencies, cryptocurrencies, is not necessarily incapability or shortcomings of traditional currencies but rather the development of the internet and its networks. Unfortunately, cryptocurrencies raise more controversies on questions such as legal framework, financial risks, or effect on the economy. This is a challenge for the financial sector and the existence of financial centers. In the beginning, it is necessary to define Virtual Currencies. This type of currency can be defined as International Monetary Fund (IMF) in a research: Monetary and Capital Markets, Legal and Strategy and Policy Review. Departments describes digital representations of value issued by private developers and denominated in their own unit of account. This definition clarifies the usage of virtual currencies as it has the functionality to be transacted electronically, stored, accessed if two parties of a transaction confirm an exchange. Virtual currencies emerged because of the creation of a blockchain or so-called distributed ledger system. This system is exceptional because of decentralization principles. The most important detail in a system is the unique ledger of transactions. Bitcoin technology allows to have a consensus between

members of a network and decentralize transactions within a network *Why the Law Needs to Encompass Token* Anjuli v. Hülst, 2024-03-04 Academic Paper from the year 2021 in the subject Law Miscellaneous grade 1 0 University of Bologna language English abstract This paper examines the question of whether and why distributed ledger token should be legally encompassed To ensure a fundamental understanding it first describes the basic features of the distributed ledger technology and the main characteristics of token This is followed by a look at the function of law in general as well as with regard to property and technology in particular From these considerations the necessity of recognizing token as legal goods is derived coming to the concluding section where it will be addressed whether property law can be used to encompass token Though not evaluating any specific application of norms the paper argues for a corresponding openness in legal interpretation especially when it comes to disruptive technologies **Blockchain: A Practical Guide to Developing**

Direct and Indirect Participation and Feasibility** Philipp Rothe, 2023-05-24 Master's Thesis from the year 2023 in the subject Business economics Investment and Finance grade 1 0 International School Of Management Campus Frankfurt language English abstract The aim of the master thesis is to examine whether private equity is suitable for tokenization After analyzing different characteristics of private equity such as the illiquidity or mechanisms like capital calls the master thesis concluded that the asset class is suitable Private equity shares in the form of security tokens can help to reduce illiquidity and cashflows like the capital calls can be automated by the use of smart contracts For the tokenization the master thesis recommends to use existing standards such as the Ethereum blockchain or the ERC 1400

token Furthermore different structures for issuing private equity tokens were elaborated These include a structure for an indirect participation via a special purpose vehicle which issues tokens and simultaneously invests into a fund but also a direct participation where the fund itself can issue tokens During the description of possible structures all relevant laws were included These include the German Electronic Securities Act eWpG German Banking Act KWG Security Prospectus Act WpPG Capital Investment Act VermAnlG Securities Trading Act WpHG and the German Investment Code KAGB All structures were evaluated from the perspective of private equity funds institutional investors private investors or other relevant intermediaries Also benefits and challenges for the different structures and participants were discussed The benefits include an increase in efficiency of several processes potential cost savings the possibility for funds to reach more investors or the possibility for investors to diversify their portfolio more Still these benefits could only be made use of if major challenges are mastered by the market participants These include an insufficient legal framework different hurdles when implementing a secondary market or the problem that theoretical approaches might work differently in reality

Blockchain Technology Enabled E-Voting System. Challenges, Impacts and Developments ,2020-10-26 Studienarbeit aus dem Jahr 2020 im Fachbereich Informatik IT Security SRH Hochschule Berlin fr her OTA Sprache Deutsch Abstract In this paper the author talks about electronic voting systems requirements strengths and challenges associated with them The paper explores more on Blockchain technology including benefits impacts risks in implementing the Blockchain based electronic voting system and touch upon the current e voting projects Finally the author describes the proposed model for E Voting system and concludes this report Voting is an essential tool for any democratic government it s the most important factor which makes government for the people and by the people until now the paper ballot has been used for voting in most countries of the world where voters mark their vote on the paper and put it in the ballot box and at the end of election the votes are counted but the biggest disadvantage of this system is that it cannot be auto mated and voters have to physically go to the location for voting that makes the entire process very time consuming and expensive also digital ballots are vulnerable to hackers and results can be compromised with the Blockchain technology and cryptography any user can login in GUI using the credentials provided by national election authority and cast

their vote by signing it with their private key and trusted miners could verify whether the votes are legit or not by using voter's public keys that makes the entire e voting process transparent cost effective safe and secure The proposed system consists of a GUI an application interface central database Blockchain network Pre election registration process voting counting final election results and auditing were explained The consensus algorithm was proof of work all the election properties such as validity privacy individuality flexibility etc were satisfied

Distributed Ledger Technology Implications Of Blockchain Introduction

In the digital age, access to information has become easier than ever before. The ability to download Distributed Ledger Technology Implications Of Blockchain has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Distributed Ledger Technology Implications Of Blockchain has opened up a world of possibilities. Downloading Distributed Ledger Technology Implications Of Blockchain provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Distributed Ledger Technology Implications Of Blockchain has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Distributed Ledger Technology Implications Of Blockchain. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Distributed Ledger Technology Implications Of Blockchain. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Distributed Ledger Technology Implications Of Blockchain, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves,

individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Distributed Ledger Technology Implications Of Blockchain has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
