Hansen, Maryanne M. Mowen, 1997 The second edition of this popular text presents a thorough treatment of both traditional and contemporary approaches to cost management accounting and control [A Contracting Theory for Predicting and Managing Cost Behavior](#) Philip Beaulieu, 2015 The traditional concept of variable and fixed cost behavior is not accepted by all authorities in cost and management accounting e.g. Anderson Banker and Janakiraman 2003 Kaplan and Witkowski 2014 This paper proposes a nexus of cost contracts theory in which costs are fixed and variable with respect to individual contracts for inputs and contracts expire at different times within a single planning period Resulting total cost functions may or may not appear to have variable and fixed costs or to be symmetric The theory provides interesting insights regarding the relationship between budgeting and outsourcing the importance of negotiating skill to managing costs the role of predicting contract parameter usage risks and opportunities related to cost contract expirations cost information system requirements cost allocation and asymmetric cost behavior *Management Accounting, Organizational Theory and Capital Budgeting: 3 Surveys* Robert W Scapens, 1984-11-19 [Contemporary Management Accounting Practices in UK Manufacturing](#) David Dugdale, 2005-11-15 This report investigates the presentation and analysis of financial information in 41 UK Manufacturing companies Traditional and contemporary accounting techniques are exemplified in the case studies With old and new techniques explored the research shows that there is little that is new in management accounting theory and practice The study concludes that there is not one set of practices which all should follow CIMA research report reveals methods currently used for reporting financial information in UK manufacturing companies Based on 41 companies it shows a rich diversity of reporting practices that are constrained neither by the financial accounting requirements of SSAP9 nor by any sense of general management accounting trends Financial Directors choose from a toolkit of traditional and

contemporary practices in constructing reporting systems appropriate to their varied commercial needs but with a strong leaning towards contribution margin approaches

Cost Management Research Rajiv D. Banker, 2017 The traditional view of cost behavior assumes a simple mechanistic relation between cost drivers and costs In contrast contemporary cost management research recognizes that costs are caused by managers operating decisions subject to various constraints incentives and psychological biases This conceptual innovation opens up the black box of cost behavior and gives researchers a powerful new way to use observed cost behavior as a lens to study the determinants and the consequences of managers operating decisions In 2014 Banker and Byzalov presented an overview of the economic theory of cost behavior and major estimation issues The research literature on cost management has grown rapidly in the past few years and enhanced the understanding of how managerial decisions influence observed costs In this study we provide a comprehensive review of recent findings and insights with a particular emphasis on the implications of cost management for understanding issues in cost managerial and financial accounting and challenges and opportunities for future research
