conditions Conventional wisdom tells us that people are rational and make rational decisions with their money But that s simply not true considering most people fail to beat the market Conventional wisdom also tells us that there are two primary ways to approach the market technical and fundamental analysis Again that is not true because if it were everyone would be rich Think about it how many times have you seen stocks with poor fundamentals go up or stocks with great technicals go down It s obvious that something is missing Author Adam Sarhan Founder and CEO of 50 Park Investments developed a new approach titled Psychological Analysis PA Coined by the author the term teaches you how to make rational not emotional decisions with your money and shows you how to analyze both the individual and collective market mindset at a particular time based on the behavior and decision making of people in the real world Psychological Analysis is designed to tip the odds of success in your favor After studying every major economic and market cycle going back to the 3rd century the author explains that human nature is the one constant and tells you what actually drives markets Psychological Analysis is responsible for major and minor market moves today tomorrow and all throughout history Adam shows you that there are more factors that influence price than just fundamental or technical analysis and how to bring out the smart money superhero inside you This invaluable guide helps you Make rational not emotional decisions with your money especially when you are under pressure Understand the psyche of the market so you can learn how to join the Smart Money Circle and consistently take money out Generate above average returns in all market environments Incorporate Psychological Analysis into your overall trading and investing strategy so you can make smarter decisions on and off Wall Street Psychological Analysis How to Outsmart the Market One Trade at a Time is a must have resource for traders investors finance professionals and anyone who wants to profit regardless of market conditions *Intelligent Trading Systems* Ondrej Martinsky,2010-02-15 This work deals with the issue of problematic market price prediction in the context of crowd behavior **Intelligent Trading Systems** describes technical analysis methods used to predict price movements **Online Investing on the Australian Sharemarket** Roger Kinsky,2012-02-23 In this complete guide to cyber investing Roger Kinsky explains in plain English how you can become a proficient online investor and use the internet to increase your profits He demystifies the complexity of online investing and provides a comprehensive insight into the online trading process The book is written for Australian investors and is an informative one stop guide to the investment information services and resources available online It covers everything from finding the most appropriate broker to setting up an online trading account placing orders and much more *A Practical Introduction to Day Trading* Don Charles,2018-11-14 Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations However many of these new traders lose their money in attempting to do so The reason for this is often because these new traders lack any fundamental understanding of financial markets they cannot interpret any data and they have no strategy for trading Trading in markets is really about deploying strategies and managing risks Indeed successful traders are those who have strategies which they

have proved to be consistent in granting them more financial gains than financial losses The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets and assist them in gaining the technical skills required to profit from trading It represents a beginner s guide to trading with a core focus on stocks and currencies
