Vibe Coding for Beginners Ilyas Serter, 2025-04-07 If you've ever had an idea for an app, a tool, or a small solution to a problem and stopped because you thought you're not technical enough, this book is for you. *Vibe Coding for Beginners* is more than just a guide to building with AI; it's a mindset installation. It helps you see technology not as a barrier but as a playground. With minimal jargon and full encouragement, this book gets you thinking like a modern builder: fast, creative, and unafraid to try. It's not about becoming a master coder; it's about learning how to collaborate with today's AI tools to bring your ideas to life on your own terms and at your own pace. Created by Ilyas Serter, a developer who's been building for two decades and still remembers how confusing it all felt at the start, this book is an invitation to skip the gatekeeping and start creating. It's designed to put readers into an AI-powered entrepreneur mindset and provide practical examples. You'll learn how to use AI tools like ChatGPT, Cursor, and GitHub Copilot to build projects without memorizing syntax. Go from idea to working prototype in a weekend or even a day. Break past the overwhelm and build your confidence, one small project at a time. Explore new tech without needing to catch up or be perfect. This book is for you if you're a solopreneur or founder with ideas but no dev team, a student curious about tech or entrepreneurship, or someone switching careers and not knowing where to start. You've been watching AI from the sidelines, wondering if it's for you. It is. You're not late; you're right on time. All you need is an idea, a little curiosity, and a willingness to try. This book is a great first step, and it will give you the momentum to keep going.
