Towards Sustainable Development Goal of Zero Hunger: Exploring the Dynamic Relationships between Food Pricing, Agriculture, and Food Security Noshaba Aziz, Wioletta Żukiewicz-Sobczak, Ruishi Si, 2025-10-16 United Nations Sustainable Development Goal SDG 2 aspires to eradicate hunger by 2030 emphasizing the intricate relationships between agriculture food security and nutrition However this noble pursuit faces formidable challenges in emerging countries due to a confluence of international disruptions Climate change the COVID 19 pandemic and geopolitical conflicts like the war in Ukraine have triggered sharp spikes in commodity prices amplifying food security concerns particularly in developing nations The Food and Agriculture Organization of the United Nations recently reported the highest global food price increase since the 1990s in March This commodity price inflation in turn reverberates across agriculture impacting not only a nation's economy but also its food production capacity Elevated commodity prices drive up the costs of agricultural inputs such as fertilizers pesticides and fuel compelling farmers to pass these expenses on to consumers in the form of higher food prices Moreover country specific economic factors within the agricultural sector including land ownership technology adoption farming practices and infrastructure further complicate the food security landscape Therefore the intricate interplay between commodity price inflation agriculture and food security is significantly influenced by a nation's unique economic dynamics within its agricultural sector Effectively addressing these challenges necessitates a blend of international and domestic policy measures to ensure that the benefits of agricultural progress reach the broader population
