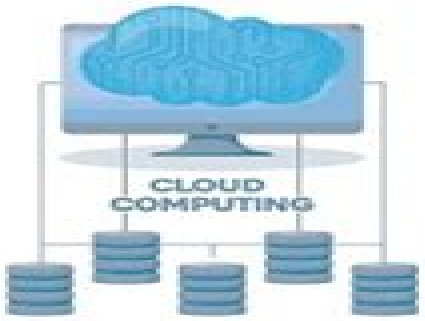
GUIDE TO CLOUD COMPUTING

WHAT IS CLOUD COMPUTING?

Cloud computing is the on-demand delivery of IT resources over the Internet with pay-as-you-go pricing. Instead of buying, owning, and maintaining physical data centers and servers, you can access technology services, such as computing power, storage, and databases on an as-needed basis.

WHERE'S MY DATA?

Data typically goes to large data centers in the network, depending on the type of cloud.
It's really just a name for storing processing data online.
For example, many of us already use cloud computing when using the internet for storing photos and email.



WHAT ARE THE DIFFERENT CLOUD SERVICES?

1. **SOFTWARE-AS- A-SERVICE**
It enables a user to be able to use an application without installing it on a computer or other type of device.

2. **PLATFORM-AS-A-SERVICE**
It allows third parties to build applications without buying hardware or maintaining software.

3. **INFRASTRUCTURE-AS-A-SERVICE**
It provides hardware capacities as demanded by users to run their own software services.

WHAT ARE THE DIFFERENT TYPES OF CLOUD?

- **PRIVATE** — Resource dedicated to one customer
- **PUBLIC** — Resources shared by multiple customers
- **HYBRID** — Customized combination of shared and dedicated resource
- **COMMUNITY** — Dedicated resource for a group of customers

WHY USE THE CLOUD?

Everything you need is always right at your fingertips. Whether you are on your desktop at the office, your smart phone waiting in line or on your tablet on the couch, everything is accessible through the Internet.

REDUCE COST

Using the cloud can save money. It minimizes IT requirements, reduces physical storage space, minimizes in-house maintenance, and saves money on expensive hardware & licensing. Instead of buying expensive equipment & programs, you buy a subscription that is scalable (only using/paying what you need) and your software is always up to date.

COLLABORATION

Saving and accessing files on the cloud means everyone can work from the same document. Plus, small/medium businesses don't have servers with the capacity to send large documents. The cloud offers endless space, increasing the potential for collaboration.

REMOTE ACCESS

Employees and clients can access documents, files, and emails from anywhere in the world over a secure internet connection. Files and people are no longer stuck on any single device.

BACKUP SECURITY

Reduce the risk of losing time and data because of natural disasters, human error, hackers, and viruses by backing up your data off-site.

SAVE TIME

The cloud helps increase response time, reduce travel time, and enhance out-of-office work time.

WHY ARE COMPANIES SHIFTING TO CLOUD?

Predictable Budgeting
Cloud is delivered as a monthly subscription. Say goodbye to costly infrastructure upgrades with predictable monthly budgeting.

Fully Managed
Be confident in the knowledge that your cloud IT estate is fully managed, updated, protected, monitored, and maintained to the highest standard.

Scale As Required
As and when your business changes in size we'll simply scale your cloud provision match. Never pay for more than you actually need!

Ultimate Flexibility
Work from anywhere with an internet connection. Log in to access the cloud on any PC, tablet or laptop. Commute is a failure, or everyday hassle, or just enable flexible working.

Business Continuity
Thinking about backups is a thing of the past, your cloud is regularly securely backed up, so in the event of an office disaster or computer failure you can reconnect and carry on as normal on any device.

Always Up-to-date
Operating systems and software are constantly, discreetly updated to their latest versions, ensuring up-to-the-minute security patching and minimal downtime during working hours.
