

Read the following passage, then answer the questions below:

The zoo is one of the most interesting places in Kuwait. It is a place where we can see animals from different countries. Some people don't like zoos. They think it is very cruel to keep animals in cages. Other people think that it's good for animals to be in the zoo for many reasons; the animals have good food every day. If they are ill, they are given medicine. In the zoo, they will be safer.

Large animals like tigers, lions, bears and elephants are unhappy in cages because they used to live in wide open areas. They like to live freely. Most children enjoy their visit to the zoo. They enjoy watching the animals. They usually prefer to look at huge animals. Some of them are very unkind to animals. They throw things at them and annoy them.

Gorayska,1995-12-01 In this book the editors have gathered a number of contributions by persons who have been working on problems of Cognitive Technology CT The present collection initiates explorations of the human mind via the technologies the mind produces These explorations take as their point of departure the question What happens when humans produce new technologies Two interdependent perspectives from which such a production can be approached are adopted How and why constructs that have their origins in human mental life are embodied in physical environments when people fabricate their habitat even to the point of those constructs becoming that very habitat How and why these fabricated habitats affect and feed back into human mental life The aim of the CT research programme is to determine in general which technologies and in particular which interactive computer based technologies are humane with respect to the cognitive development and evolutionary adaptation of their end users But what does it really mean to be humane in a technological world To shed light on this central issue other pertinent questions are raised e g Why are human minds externalised i e what purpose does the process of externalisation serve What can we learn about the human mind by studying how it externalises itself How does the use of externalised mental constructs the objects we call tools change people fundamentally To what extent does human interaction with technology serve as an amplification of human cognition and to what extent does it lead to a atrophy of the
