Late, Late Industrial Revolution Sumit Kumar Majumdar, 2012-05-24 Catalogues and explains India's late industrial revolution through a combination of rigorous analysis and entertaining anecdotes **Navigating World History** P. Manning, 2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph.D.s in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today's disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history *Agricultural Development in China, 1368-1968* Dwight H. Perkins, 2017-07-12 *Agricultural Development in China* explains how China's farm economy historically responded to the demands of a rising population Dwight H. Perkins begins in the year A.D. 1368 the founding date of the Ming dynasty More importantly it marked the end of nearly two centuries of violent destruction and loss of life primarily connected with the rise and fall of the Mongols The period beginning with the fourteenth century was also one in which there were no obvious or dramatic changes in farming techniques or in rural institutions The rise in population and hence in the number of farmers made possible the rise in farm output through increased double cropping extending irrigation systems and much else Issues explored in this book include the role of urbanization and long distance trade in allowing farmers in a few regions to specialize in crops most suitable to their particular region Backing up this analysis of agricultural development is a careful examination of the quality of Chinese historical data This classic volume now available in a paperback edition includes a new introduction assessing the continuing importance of this work to understanding the Chinese economy It will be invaluable for a new generation of economists historians and Asian studies specialists and is part of Transaction's Asian Studies series *Trading Economics* Zhenying Wang, 2024-05-03 This book reconstructs the theoretical framework of economics by examining the concept of trading the trading network and the evolution of a trading system tied together by the notion of bounded rationality Trading economics uproots the theoretical paradigm of mainstream economics and enables timeworn economic thinking to deal with the various complex phenomena of the modern economy Mainstream economic theories see growth as the combined result of family and enterprise activities Based on this understanding established economic policies all focus on how to effectively influence the behavior of trading agents Trading economics by contrast believes economic growth is the product of the activities of a self-organizing network of families and enterprises rather than a simple superposition of the behaviors of trading agents In policy design trading economics looks to maintain the structural integrity of the trading network and the stability of the trading cycle *Outlines and Highlights for Concise Economic History of the World* Cram101 Textbook
