Environmental Change and Security Project Report P. J. Simmons,1995 Environmental Change and Security Project Report ,1997 **Environmental change and security report** ,1997 **Human Security and the Environment** Edward Page,M. R. Redclift,2002 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They also discuss a number of theoretical issues which underpin discussions of environmental security demonstrating that this is a relatively new and essentially contested concept This thought provoking book highlights the way in which both security and sustainability are being reworked as concepts and are being linked increasingly to social economic and cultural factors It will be of great interest to academics researchers and students in environmental management sociology geography international relations and politics *Dangerous Intersections* Jael Miriam Silliman,Ynestra King,1999 This collection of original critical essays by well known feminist scholars and activists presents a multicultural international scope on the major global issues of the day environment development and population control The authors pointed analyses reveal the racism behind environmental degradation and immigration control the paternalism underlying many population control efforts and the widespread scapegoating of women the poor and immigrants as the source of major world problems *Dangerous Intersections* presents realistic solutions that rely on the ingenuity and resourcefulness of local communities of women as the agents of global change Essays cover topics such as the use and mis use of reproductive technology the real impact of population growth on the environment the devastating effects of militarism and consumption and movements for sovereignty and social justice worldwide *Dangerous Intersections* will force readers to confront the intertwined effects of our attitudes toward

population the environment and development This call for just equitable solutions to urgent problems will enlighten activists scholars and policy makers alike Security and Development Neclâ Yongaçoğlu Tschirgi, Michael S. Lund, Francesco Mancini, 2010 Although policymakers and practitioners alike have enthusiastically embraced the idea that security and development are interdependent the precise nature and implications of the dynamic interplay between the two phenomena have been far from clear The authors of Security and Development Searching for Critical Connections realistically assess the promise and shortcomings of integrated security development policies as a strategy for conflict prevention Addressing cross cutting issues and also presenting detailed country case studies they move beyond rhetoric and generalization to make an important contribution to the international conflict prevention agenda **Migration and Climate Change** Oli Brown, International Organization for Migration, 2008 This report focuses on the possible future scenarios for climate change natural disasters and migration and development looking to increase awareness and find answers to the challenges that lie ahead It states that even though it is defined as a growing crisis the consequences of climate change for human population are unclear and unpredictable The study points out that scientific basis for climate change is increasingly well established and confirms that current predictions as to the carrying capacity in large parts of the world will be compromised by climate change **Encyclopedia of Global Environmental Change, Set** Ted Munn, Michael C. MacCracken, John S. Perry, Harold A. Mooney, Josep G. Canadell, Ian Douglas, Mostafa K. Tolba, Peter Timmerman, 2002 THE DEFINITIVE RESOURCE The Encyclopedia of Global Environmental Change is the first major reference work in this multi disciplinary field and presents Outstanding authorship and high quality editing Comprehensive coverage with over 3 800 pages in 5 volumes Over 500 articles 100 biographies 150 definitions and 100 acronyms Extensive bibliographies with up to date references ABOUT THE ENCYCLOPEDIA The Wiley Encyclopedia of Global Environmental Change has been published to meet the need for a comprehensive integrated reference in this burgeoning field It consists of five volumes of inter related material Volume 1 The Earth System Physical and Chemical Dimensions of Global Environmental Change Volume 2 The Earth System Biological and Ecological Dimensions of Global Environmental Change Volume 3 Causes and Consequences of Global Environmental Change Volume 4 Responding to Global Environmental Change Volume 5 Social and Economic Dimensions of Global Environmental Change Each volume contains articles of between 1 000 and 10 000 words on major topics Articles contain an abstract written for the non specialist followed by the main text which provides greater detail for the specialist Biographies of distinguished environmental scientists discuss their contributions to a better understanding of global environmental change Definitions of international terms and descriptions of acronyms of international and regional programs and agencies provide a quick reference source for the environmental scientist and student Presents a thematic approach and includes theory empirical studies and applications emphasising the inter relationship between various disciplines and systems **Human Choice and Climate Change: The societal framework** Steve Rayner, Elizabeth L. Malone, 1998 International Journal

,2006 **The Development Economics Reader** Giorgio Secondi,2008 This book draws together the most authoritative articles on development economics published in the past few years is aimed at undergraduate level and is suitable for students with little or no background in economics The main themes include poverty foreign aid agriculture and human capital and amongst those whose work appears cannot be counted Amartya Sen Jeffrey Sachs Jagdish Bhagwati Joseph Stiglitz Paul Romer Dani Rodrik William Easterly Robert Barro Kenneth Arrow Hernando de Soto Daron Acemoglu Muhammad Yunus Anne Krueger Abhijit Banerjee Esther Duflo Michael Kremer and Martin Feldstein The reader focuses on the most recent and up to date contributions to the field of development economics Instead of collecting classic contributions which are already available through many sources the articles chosen reflect recent developments in the discipline for instance in the area of geography and development and include contributions that address recent events the dramatic resurgence of a debt relief movement The Development Economics Reader should be an invaluable resource for all students of the discipline Asian Environment Outlook ,2001
