Business Management Corporate Governance grade 1 University of Salzburg International Executive MBA General Management Upgrade language English abstract Information technology IT plays a major role in today's companies. Although in most firms IT does not generate the core customer value itself, it rather supports creating additional customer value or enables cost efficiency of business processes. This is why IT departments are viewed in most cases as service centres of companies providing a defined set of services for as low costs as possible. But service centres should still strive to provide only these services which are necessary for supporting the company's strategy. Caused by the current financial crisis uncertain times for businesses are expected. This makes strategy alignment and execution of IT departments even more significant in order to stay efficient and effective. But a recent survey carried out by McKinsey Company shows that there are still enormous potentials for improving the performance of IT departments. For example the survey shows that the basic services are met quite well by many IT departments but the big challenges for supporting the business still remain. Also 67% of all respond
