Alexander James Wallis-Taylor

Industrial Chocolate Manufacture And Use 4th Edition:

Industrial Chocolate Manufacture and Use Steve T. Beckett, 2011-09-07 Since the third edition of this standard work in 1999 there has been a significant increase in the amount of chocolate manufactured worldwide The fourth edition of Industrial Chocolate Manufacture and Use provides up to date coverage of all major aspects of chocolate manufacture and use from the growing of cocoa beans to the packaging and marketing of the end product Retaining the important and well received key features of the previous edition the fourth edition also contains completely new chapters covering chocolate crumb cold forming technologies intellectual property and nutrition Furthermore taking account of significant changes and trends within the chocolate industry much new information is incorporated particularly within such chapters as those covering the chemistry of flavour development chocolate flow properties chocolate packaging and chocolate marketing This fully revised and expanded new edition is an essential purchase for all those involved in the manufacture and use of chocolate

Beckett's Industrial Chocolate Manufacture and Use Steve T. Beckett, Mark S. Fowler, Gregory R. Ziegler, 2017-02-28 Since the publication of the first edition of Industrial Chocolate Manufacture and Use in 1988 it has become the leading technical book for the industry From the beginning it was recognised that the complexity of the chocolate industry means that no single person can be an expert in every aspect of it For example the academic view of a process such as crystallisation can be very different from that of a tempering machine operator so some topics have more than one chapter to take this into account It is also known that the biggest selling chocolate in say the USA tastes very different from that in the UK so the authors in the book were chosen from a wide variety of countries making the book truly international Each new edition is a mixture of updates rewrites and new topics In this book the new subjects include artisan or craft scale production compound chocolates and sensory This book is an essential purchase for all those involved in the manufacture use and sale of chocolate containing products especially for confectionery and chocolate scientists engineers and technologists working both in industry and academia The new edition also boasts two new co editors Mark Fowler and Greg Ziegler both of whom have contributed chapters to previous editions of the book Mark Fowler has had a long career at Nestle UK working in Cocoa and Chocolate research and development he is retiring in 2013 Greg Ziegler is a professor in the food science department at Penn State University in the USA

The Science of Chocolate Stephen T Beckett, 2007-10-31 Chocolate is available to today's consumers in a variety of colours shapes and textures But how many of us as we savour our favourite brand consider the science that has gone into its manufacture This book describes the complete chocolate making process from the growing of the beans to the sale in the shops The Science of Chocolate first describes the history of this intriguing substance Subsequent chapters cover the ingredients and processing techniques enabling the reader to discover not only how confectionery is made but also how basic science plays a vital role with coverage of scientific principles such as latent and specific heat Maillard reactions and enzyme processes There is also discussion of the monitoring and controlling of the

production process and the importance and variety of the packaging used today A series of experiments which can be adapted to suit students of almost any age is included to demonstrate the physical chemical or mathematical principles involved Ideal for those studying food science or about to join the confectionery industry this mouth watering title will also be of interest to anyone with a desire to know more about the production of the world s favourite confectionery **Ullmann's Food and Feed, 3 Volume Set** Wiley-VCH,2017-06-19 A compilation of 58 carefully selected topical articles from the Ullmann s Encyclopedia of Industrial Chemistry this three volume handbook provides a wealth of information on economically important basic foodstuffs raw materials additives and processed foods including a section on animal feed It brings together the chemical and physical characteristics production processes and production figures main uses toxicology and safety information in one single resource More than 40 % of the content has been added or updated since publication of the 7th edition of the Encyclopedia in 2011 and is available here in print for the first time The result is a best of Ullmann s bringing the vast knowledge to the desks of professionals in the food and feed industries Science and Technology of Enrobed and Filled Chocolate, Confectionery and Bakery Products Geoff Talbot,2009-06-26 Enrobed and filled confectionery and bakery products such as praline style chocolates confectionery bars and chocolate coated biscuits and ice creams are popular with consumers The coating and filling can negatively affect product quality and shelf life but with the correct product design and manufacturing technology the characteristics of the end product can be much improved This book provides a comprehensive overview of quality issues affecting enrobed and filled products and strategies to enhance product quality Part one reviews the formulation of coatings and fillings with chapters on key topics such as chocolate manufacture confectionery fats compound coatings and fat and sugar based fillings Product design issues such as oil moisture and ethanol migration and chocolate and filling rheology are the focus of Part two Shelf life prediction and testing are also discussed Part three then covers the latest ingredient preparation and manufacturing technology for optimum product quality Chapters examine tempering enrobing chocolate panning production of chocolate shells and deposition technology With its experienced team of authors Science and technology of enrobed and filled chocolate confectionery and bakery products is an essential purchase for professionals in the chocolate confectionery and bakery industries Provides a comprehensive review of quality issues affecting enrobed and filled products Reviews the formulation of coatings and fillings addressing confectionery fats compound coatings and sugar based fillings Focuses on product design issues such as oil moisture and chocolate filling rheology **Industrial Chocolate Manufacture and Use** S T Beckett,1995-12-31 Drying and Roasting of Cocoa and Coffee Ching Lik Hii,Flávio Meira Borém,2019-06-26 This is the first practical book dedicated to the fundamental and application aspects of two major unit operations in cocoa and coffee processing namely drying and roasting The drying and roasting of cocoa and coffee beans play critical roles in governing the formation of flavor precursors in the early stages and also the development of flavor and aroma in the later stages during processing Hence qualities of the finished chocolates and

coffee powder products are affected greatly by the dried and roasted beans produced Drying and Roasting of Cocoa and Coffee covers key topics areas ranging from post harvest processing equipment selection physical and chemical changes during processing flavor development grading and dried product quality The book consists of two parts with topics dedicated to the drying roasting aspects of cocoa and coffee respectively Features Provides a comprehensive review on flavor development during cocoa coffee processing Discusses the impact of processing parameters on cocoa coffee quality Presents the new trends in drying roasting techniques and novel technology Examines the concept of coffee quality in light of both paradigms the traditional coffee and the specialty coffee grading systems No prior knowledge of cocoa and coffee processing is required to benefit from this book which is written for a variety of readers It is suitable for undergraduate and postgraduate students researchers and industrial practitioners consultants from various domains in the food and beverage industries

Trends in Sustainable Chocolate Production Charis M. Galanakis,2022-02-24 Chocolate is consumed by people of all ages in all segments of society throughout the world However recent changes in legislative frameworks environmental concerns and increasing attention towards sustainability have stimulated the chocolate industry to reconsider their management policy Current books in the market cover chocolate manufacture without taking into account sustainable practices of production consumption and market aspects Trends in Sustainable Chocolate Production fills this knowledge gap by covering all the important aspects of chocolate industry manufacture functionality sustainability of the supply chain commercialization aspects and market characteristics in one reference Starting with the health outcomes of chocolate and an overview of its manufacture the book explores techniques to improve the functionality flavor and microstructure of chocolate as well as its environmental impact through sustainable practices and supply chains By connecting research to industry and consumer interests this text aims to support members of the scientific community professionals and enterprises working to develop a sustainable chocolate sector

Confectionery Science and Technology Richard W. Hartel,Joachim H. von Elbe,Randy Hofberger,2017-10-09 This book examines both the primary ingredients and the processing technology for making candies In the first section the chemistry structure and physical properties of the primary ingredients are described as are the characteristics of commercial ingredients The second section explores the processing steps for each of the major sugar confectionery groups while the third section covers chocolate and coatings The manner in which ingredients function together to provide the desired texture and sensory properties of the product is analyzed and chemical reactions and physical changes that occur during processing are examined Trouble shooting and common problems are also discussed in each section Designed as a complete reference and guide Confectionery Science and Technology provides personnel in industry with solutions to the problems concerning the manufacture of high quality confectionery products
